

Environmental

SERVICES FOR OIL & GAS

Overview

Westwood has the understanding and experience to facilitate a wide range of services and ensure the successful completion of a broad spectrum of project types for the oil and gas industry. For nearly 10 years, Westwood has provided environmental services on a variety of projects throughout the United States. These projects have included oil and gas exploration wells, field and unit developments, infrastructure development, and oil and gas transportation and storage.

Winning Approval Strategies

The quality of Westwood's work is based on outstanding technical service, professionalism, innovation, careful communication, and adherence to budgets and schedules. In fact, the majority of Westwood's work is from repeat clients, demonstrating our ability to adhere to schedule and budget requirements while completing high-quality technical work products.

Team Integration

Up-to-date integrated services and strong team relationships are the tools Westwood brings to support project success. While the job is underway, new data is rapidly gathered and shared and communication lines never close. With constant collaboration, we deliver highly organized project management and activities guided by the objectives of the client.
