

ground surface visibility (GSV) of the Project APE ranged from 0% to 10%. No previously recorded cultural resources are present in the Project APE (please see DT 1459 Form). Six shovel tests were excavated to confirm the disturbance in the APE, which is likely from airport construction (Appendix X). No cultural resources were identified during the pedestrian survey. No further work is recommended on behalf of the client for the Project.

ISOLATED FINDS – Describe. Also, attach map, showing location.

0

I certify that the literature search and all fieldwork conducted for this report was done according to the Wisconsin Archeological Survey Guidelines. No archeological sites were identified in the project area.
