1.0 Executive Summary

Westwood Professional Services, Inc. (Westwood) performed this Phase I Environmental Site Assessment (Phase I ESA) for Milwaukee Mitchell International Airport (User) in support of the removal of the Runway 13-31 on the Subject Property located on a portion of Milwaukee County parcel 6409999120, in the City of Milwaukee, Milwaukee County, Wisconsin (Subject Property) (reference Figure 1 - Location Map, Appendix 1). This Phase I ESA generally conforms to the scope and limitations of American Society for Testing and Materials (ASTM) Standard E 1527-21 and 40 CFR § 312 Subp. C., All Appropriate Inquiries (AAI) Standards and Practices.

The Subject Property consists of a portion of the parcel owned by Milwaukee County Airport and the airport associated to the property operates under the name Milwaukee Mitchell International Airport. The Subject Property area is approximately 3.00 sq. mi. in size. An airport runway currently exists on the Subject Property and intersects several runways and access roads. Historical documentation suggests that the existing runway was initially unpaved and occupied the northern portion of the Subject Property. The existing runway on the Subject Property appears to have been paved and extended sometime between 1937 and 1941. The southern portion of the Subject Property was primarily agricultural land until airport operations expanded in the 1940s. No significant details or discoveries were noted during the site reconnaissance.

The surrounding area to the Subject Property is primarily used for airport operations with residential and commercial land adjoining the airport property. A National Guard refueling wing is located on the southern-southeastern adjoining property to the Subject Property. In the general southwestern direction is the primary airport operations of the Milwaukee Mitchell International Airport.

The Subject Property was included on multiple reviewed databases; however, after review of the databases, the location of these listings appeared to consist of the general airport property and not the specific location of the Subject Property. For this reason, each listing was reviewed to identify the proximity of the listing to the Subject Property and determine if areas of environmental concern with respect to the Subject Property exist. Due to factors including proximity of the sites, cleanup methods, extent of the investigations, and direction of groundwater flow, all but one of the listings reviewed on the databases provided for the Subject Property and the adjoining properties indicated environmental impacts on the Subject Property with respect to the scope of the project.

One ASTM Controlled Recognized Environmental Condition (CREC) was identified associated to the Subject Property. The listing on the Environmental Repair Program (ERP) report was noted as closed with continuing obligations and a review of the site investigation documentation on the Bureau for Remediation and Redevelopment Tracking System (BRRTS) site (Activity No: 02-41-558334) showed soil impacts still in the subsurface. This release was known to be caused by a leaking underground piping system releasing jet fuel. Investigation efforts included the excavation of impacted soil; however, a relatively small amount of impacted soil was not excavated due to the proximity of the 250-foot offset for the main north-south runway. Due to the remaining soil contamination in the vicinity of the Subject Property, this previous release is a CREC with respect to the Subject Property; however, the scope of this runway removal project indicates that this CREC is not likely to impact the scope of this project.

No other listings reviewed on the databases indicate environmental impacts on the Subject Property with respect to the scope of this project. No ASTM Recognized Environmental Conditions (RECs) or Historical Recognized Environmental Conditions (HRECs) were discovered through the scope of this

project at the Subject Property. No RECs, HRECs, or CRECs were revealed at adjoining properties that would be anticipated to impact the Subject Property.

2.0 Introduction

Westwood's scope of work for this Phase I ESA generally conforms to the American Society for Testing and Materials (ASTM) E1527-21: Standard Practice for Environmental Site Assessments: Phase I ESA Process and the AAI. The purpose of this standard practice is to define good commercial and customary practice for conducting a Phase I ESA of a parcel of real estate with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability, i.e., landowner liability protections. The ASTM standard is designed to meet the criteria mandated by CERCLA for AAI into the previous ownership and uses of the property consistent with good commercial or customary practice.

In defining a standard of good commercial and customary practice for conducting a Phase I ESA of a parcel of property, the goal of the ASTM practice is to identify RECs. The term RECs mean the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. As defined in E1527-21, the term CREC means a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. HRECs are those that were or would have been considered to be RECs in the past, but because of additional information or a change in conditions, may no longer be considered a REC.

2.1 Purpose

According to the User, the Phase I ESA was conducted in association with runway removal project on the Subject Property. Westwood performed the Phase I ESA in general accordance with ASTM Practice E1527-21 to determine if the Subject Property is known to contain an existing release, past release, or a material threat of a release of hazardous substances or petroleum products into structures or into the ground, groundwater, or surface water. The Phase I ESA process does not include sampling, which may verify or evaluate the extent of suspected environmental impacts.

2.2 Significant Assumptions

Landowner contact information, site boundaries, and other information about the Site were provided to Westwood by the User or site representative. Westwood assumes that all information supplied is true and accurate and that the boundaries of the Subject Property are accurate based on the information supplied. The identification of geologic or geotechnical hazards is beyond the scope of this project.

It is assumed that the information obtained by others is correct and that this report will be read as a whole by the User.

2.3 User Reliance

Westwood's findings and opinions in this Phase I ESA are exclusively for the use of the User. Westwood will not distribute or publish the Phase I ESA report without the consent of the User, except as required by law or court order. No other party may rely on this Phase I ESA report without Westwood's written consent. The findings and opinions contained herein are limited to use by the User. Westwood's services for this project have been performed in a manner consistent with normal standards of the profession. No other warranty or guarantee, expressed or implied, is made.

3.0 Scope of Services and Limitations

3.1 Scope of Services

The Phase I ESA has been performed in general accordance with the scope and limitations of ASTM *Standard Practice E 1527-21*. The scope of services included:

- A review of readily available physical setting records such as topographic, geological, and hydrogeological information relating to the Subject Property within the property and surrounding area.
- A review of readily available historical use records such as aerial photographs, topographic maps, fire insurance maps, city directories, or other historical information, as is deemed relevant, relating to the Subject Property within the property and surrounding area.
- A limited review of federal, state, and local regulatory information for potential environmental hazards within ASTM-defined search distances from the Subject Property
- Attempted interviews with Phase I ESA User, current property owner or representative, past property owner or representative, or other available parties, as it is deemed relevant, regarding the current and past use of the Subject Property and adjacent areas.
- A reconnaissance visit for visual characterization and observation of the Subject Property within the property and adjacent areas to obtain an understanding of the potential environmental hazards.
- Preparation and submittal of a written report in general accordance with the ASTM E1527-21 standards, which summarizes the findings of the ASTM Phase I ESA.

3.2 Limitations and Exceptions

The limitations of this Phase I ESA included:

- "Non-Scope Considerations" such as radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and high-voltage powerlines were not included as part of this assessment.
- Preparation and review of a chain-of-title, environmental lien/activities, and use limitations search were not requested.

4.0 Owner/User Provided Information

4.1 User Questionnaire

A Phase I Environmental Site Assessment User Questionnaire (ESA Questionnaire) was not completed as of the publishing of this report. A Copy of a blank ESA Questionnaire (reference Appendix 3).

4.2 Recorded Land Title Records

No recorded land title records for the Subject Property were provided for review.

4.3 Previous Environmental Reports

Previous environmental reports were provided for review during the September 11, 2023 site visit. However, their records were also provided in the online database case files and are described in section 11 of this report.

5.0 Subject Property Description

5.1 Setting and Location

The Subject Property consists of a portion of the county tax parcel 6409999120 in the City of Milwaukee, Milwaukee County, Wisconsin. The Subject Property area is approximately 3.00 sq. mi. and is adjoining the Milwaukee Mitchell International Airport. According to the Milwaukee GIS and Land Information Interactive Map the physical address associated to the Subject Property is 5300 S Howell Avenue and it is owned by Milwaukee County Airport. The Subject Property is situated at the approximate latitude, longitude 42.952, -87.895.

5.2 Surrounding Area Uses

North, Northeast, East, West and Northwest:	Airport operations, and residential and commercial land beyond
South, Southeast:	Airport operations, National Guard refueling wing, with commercial and residential land beyond

6.0 Subject Property Observations

Mr. Evan A. Dujardin conducted a visual reconnaissance of the Subject Property and surrounding area on September 11, 2023. Weather conditions at the time of the reconnaissance were cloudy with a temperature around 65°F. A photo log of the Subject Property and surrounding properties during the site reconnaissance enclosed in Appendix 4.

6.1 Current Property Use and Activity

The Subject Property is currently a part of the General Mitchell International Airport grounds. A runway was located on the Subject Property with the designation of 13 – 31. Runway pavement and utilities related to runway navigation (electrical) and stormwater were observed on the Subject

Property. Additional taxiway structures and electrical were observed south of the middle portion of the 13-31 runway. Other areas graded with green space were observed on either side of the runway (reference Figure 2 – Subject Property Site Map).

6.2 Observations

- Hazardous Substances..... None Observed
- Petroleum Products..... None Observed
- Pipelines None Observed
- Storage Tanks
 - Aboveground Storage Tanks (ASTs) None Observed
 - Underground Storage Tanks (USTs) None Observed
- OdorsNone Detected
- Pools of Liquid None Observed
- Drums or Other Containers None Observed
- Potential Polychlorinated Biphenyls (PCB) sources
 - Electrical Equipment..... None Observed
 - Hydraulic Equipment None Observed
- Waste Water
 - Surface Water Discharge None Observed
 - Process/Sanitary Discharge None Observed
 - Septic Systems..... None Observed
 - Industrial Wastewater Treatment..... None Observed
 - Holding Tanks None Observed
- Potable Water Supply
 - Municipal..... None Observed
 - Private None Observed
- Wells None Observed
- Pits, Ponds, or Lagoons..... None Observed
- Stained Soil or Pavement None Observed
- Stressed Vegetation None Observed
- Solid Waste
 - Storage None Observed

- On-Site Disposal None Observed
- Heating/Cooling..... None Observed
- Interior Staining or Corrosion..... None Observed
- Drains or Sumps None Observed
- Possible Fill Material or Buried Solid Waste..... None Observed

7.0 Surrounding Property Observations

The adjacent areas consisted primarily of airport operations including, runways, taxiways, and access roads, terminals, hangars, and parking. The National Guard 128 Air Refueling Wing is adjoining the Subject Property to the southeast. Main airport operations are located in the general southwestern direction.

8.0 Interviews

An interview was conducted during the site reconnaissance, on September 11, 2023, with one of the airport operations staff, Vlad. Vlad was not aware of any environmental issues related to petroleum products or hazardous chemicals/waste in the project area of Runway 13 – 31. He mentioned that there was a monitoring well north of the east portion portion of the runway that was installed in relation to the PFAS investigation actively being investigated at the Subject Property. He mentioned that groundwater flow was to the east toward Lake Michigan.

9.0 Historical Use Information

9.1 Aerial Photographs

Aerial Photographs of the Subject Property and vicinity dated 1937, 1941, 1950, 1955, 1963, 1971, 1981, 1987, 1992, 2000, 2005, 2008, 2010, 2013, 2015, 2017, 2018, 2020, and 2022 were obtained from Environmental Risk Information Services (ERIS) (reference Appendix 5). No additional aerial photographs were reasonably ascertainable. The following is a summary of information obtained from the aerial photographs:

1937

The Subject Property is pictured as agricultural fields with an apparent unpaved runway in the northern portion. An existing road was observed on the southern area of the Subject Property. Adjoining properties are pictured as agricultural fields with some areas of residential land, and apparent airport operations adjoining the northern portion of the Subject Property.

1941

By 1941, the unpaved runway apparent on the Subject Property appears to have been paved and extended south to the area near the existing road on the southern portion of the Subject property. Additional airport runways were observed on the northern and western adjoining properties, and land disturbance to the west of the airport runways on the western adjoining property was observed due to possible construction. The remaining adjoining properties appear relatively unchanged from the previous time period.

1950

The existing airport runway on the Subject Property appears to have been extended to the south by 1950. The remaining areas of the Subject Property appear relatively unchanged from the previous time period. Residential areas located on adjoining properties appear to have been razed and the western adjoining property appears to have additional disturbance due to construction. Additional airport runways were observed on adjoining properties, some of which intersect the existing runway on the Subject Property.

1955

The Subject property appears relatively unchanged from 1950 to 1955. Construction of the main airport buildings associated with the airport currently referred to as Milwaukee Mitchell International Airport appears to have been completed on the western adjoining property. The remaining adjoining properties appear relatively unchanged from the previous time period.

1963, 1971, 1981, 1987, 1992, 2000, 2005, 2008, 2010, 2013, 2015, 2017, 2018, 2020, and 2022

During this time period, additional runways were observed connecting to the existing runway on the Subject Property. The 1963 and 1971 aerial photographs picture additional runways on the southern area of the Subject Property, as well as an intersecting runway in the middle portion of the Subject Property. The 2008 aerial photograph pictures additional runways located in the middle section of the Subject Property. The runway located on the southern portion of the Subject Property appears to have been shifted in the 2022 aerial photograph. By 2022, the Subject Property appears in the general configuration of the current existing conditions. Additional runways and access roads appear to have been constructed on various adjoining properties throughout this time period.

9.2 City Directories

City directory records for the Subject Property were not requested for review.

9.3 Fire Insurance Maps

Fire Insurance Maps were provided by ERIS and acquired on September 7, 2023. Fire Insurance Maps were provided for 1937 and 1950. The quality of the Fire Insurance Maps made it difficult to ascertain information; however, the 1937 Fire Insurance Map identified the area north of the Subject Property as Milwaukee County Airport and included a hangar referred to as Midwest Airways Inc. Hangar No. 2. This hangar appears to be bordering the Subject Property to the north. The 1950 Fire Insurance Map Identified the General Mitchell Field as being located north of the

Subject Property. No significant environmental concerns were identified within the information provided by the Fire Insurance Maps.

9.4 Chain-of-Title

Preparation and review of a chain-of-title/environmental lien was not requested.

10.0 Physical Settings Information

10.1 Topographic Maps

The topographic map search was provided by ERIS and acquired on September 6, 2023. This searched the USGS topographic map collection of current and historical maps for the Subject Property. Topographic maps were provided for 1891, 1901, 1958, 1971, 1976, 2016 and 2018 and reviewed.

The Subject Property is shown as approximately 670 feet above mean sea level. The 1891 and 1901 topographic maps picture the Subject Property as vacant land. An airport is pictured in the 1958, 1971, and 1976 topographic maps and is referred to as General Mitchell Field. Throughout the remaining topographic maps, the airport is pictured and referred to as General Mitchell International Airport (reference Appendix 8).

10.2 Geologic Conditions

A physical settings report dated September 7, 2023, was provided by ERIS, which described the physical and geological settings of the Subject Property and surrounding properties (reference Appendix 9).

Soil Type and Permeability

According to the ERIS Physical Settings Report, the Subject Property consists of the Clayey land soils. These soils are moderately well drained and have a high runoff potential when thoroughly wet. Movement through the Clayey land soils is restricted to very restricted.

Regional Geology

According to the ERIS Physical Settings Report, the Subject Property is underlain by undivided Silurian from the Silurian Period. It is expected to consist of dolostone (dolomite) and includes the Cayugan, Niagaran, and Alexandrian series.

Groundwater Flow Direction

Based on on-site observations and the ERIS topographic maps. The groundwater in the Subject Property is anticipated to flow north to northeast towards Lake Michigan.

11.0 Environmental Records Review

11.1 Local Sources

Building Permit/Inspection Department

Westwood did not request documents from the Milwaukee Building Department as the address of the Subject Property is the same as the Airport Property and many documents not related to the Subject Property would be provided.

Fire Department

A request for records from the Milwaukee Fire Department was made for records related to the Subject Properties Parcel on October 9, 2023. No response was received as of the publishing of this report.

Planning/Zoning Department

The Subject Property zoning information was found on the Milwaukee County parcel viewer website and was listed as industrial.

Department of Health

A request for records from the Milwaukee County Health Department was made for records related to the Subject Properties Parcel on October 9, 2023. A response was received on January 3, 2024 with two listings. Listings were related to general airport operations such as cleaning restrooms and condition of onsite water fountains. These are not a concern with respect to the scope of this report.

Tax Assessor's/Appraisal/Auditor Department

Current assessment records for the Subject Property were obtained from the Milwaukee County parcel viewer website. The Subject Property is part of parcel 6409999120 and building information was not provided for the parcels.

11.2 State/Tribal Sources

Westwood used ERIS to identify state and tribal sites of known environmental concern. A copy of the ERIS *Database Report*, queried on September 8, 2023, is enclosed in Appendix 10. Some terms utilized in the ERIS report may differ from actual state identification listings. The following is a summary of the information provided.

11.2.1 State/Tribal Sites

The Wisconsin Department of Natural Resources (WDNR) *Notice of Potential Hazardous Waste Sites* and *Delisted Potential Hazardous Waste Site* databases (collectively referred to as SHWS by ERIS) were reviewed. The Subject Property is not included on the SHWS databases. In addition, no SHWS sites are reported within 0.50 mile of the Subject Property.

11.2.2 State/Tribal Solid Waste Landfill

The WDNR Licensed *Solid Waste Landfill* database (SWL/LF) was reviewed. The Subject Property is not included within this listing. In addition, no SWL/LF sites are reported within 0.50 mile of the Subject Property.

11.2.3 State/Tribal Storage Tanks

The WDNR *Registered Underground Storage Tank (UST) Database* and *Registered Aboveground Storage Tank (AST) Database*, the *Indian Underground Storage Tank Database* maintained by the United States Environmental Protection Agency (USEPA), and the *Underground Storage Tank Listing* for sites owned by the Federal Emergency Management Agency (FEMA) (collectively referred to as UST/AST) were reviewed. UST/AST listings were included on the reviewed databases on the Subject Property. All sites listed on the database report were associated with the address 5300 S Howell Avenue. Multiple USTs and ASTs may be listed for each site. The following table summarizes the UST and AST database information provided:

Site Name	AST/UST	Number/Size	Contents	Status
General Mitchell Field Concourse D	AST	2 – 275 Gallon	Fuel Oil	Closed/Removed
	AST	1 – 565 Gallon	Diesel	In Use
	UST	1 – 1,000 Gallon	Diesel	Closed/Removed

11.2.4 State/Tribal Leaky Undergrounds Storage Tanks

The Underground Storage Tank Program in the WDNR, as well as the USEPA *Leaking Underground Storage Tanks on Indian Land* (collectively referred to as OCP or LUST) were

reviewed. 5 OCP/LUST sites were listed on the reviewed databases on the Subject Property. In addition, 2 OCP/LUST sites were reported within 0.12 mile of the Subject Property. Multiple OCP/LUST listings may be provided for each individual site. The following table summarizes the OCP/LUST database information provided followed by detailed descriptions of the site activities:

Site Name	Address	Distance From Subject Property (mi/ft)	Status	Activity Number
Trans World Airlines Inc	5300 S Howell Avenue	0.00/0.00	Closed, 12/01/1998	03-41-113969
Northwest Airlines Inc	5300 S Howell Avenue	0.00/0.00	Closed, 12/13/1993	03-41-002352
General Mitchell International Airport	5300 S Howell Avenue	0.00/0.00	Closed with Continuing Obligations, 09/07/2005	03-41-005189
General Mitchell International Airport	5300 S Howell Avenue	0.00/0.00	Closed with Continuing Obligations, 06/07/2005	03-41-098832
General Mitchell International Airport	5300 S Howell Avenue	0.00/0.00	Closed, 05/26/2000	03-41-223628
General Mitchell International Airport	5300 S Howell Avenue	0.00/0.00	Closed, 12/18/1996	03-41-001375
General Mitchell International Airport	5300 S Howell Avenue	0.00/0.00	Closed with Continuing Obligations, 10/05/2018	03-41-579844
General Mitchell International Airport	5300 S Howell Avenue	0.00/0.00	Closed with Continuing Obligations, 06/07/2005	03-41-113042
General Mitchell International Airport	5300 S Howell Avenue	0.00/0.00	Closed, 12/18/1996	03-41-001178
General Mitchell International Airport	5300 S Howell Avenue	0.00/0.00	Closed, 11/20/1996	03-41-001179
Avis Car Rental, Mitchell Airport	5300 S Howell Avenue	0.00/0.00	Closed, 05/13/1994	03-41-003704
Avis Car Rental, Mitchell Airport	5300 S Howell Avenue	0.00/0.00	Closed, 01/11/1990	03-41-000511
Avis Car Rental, Mitchell Airport	5300 S Howell Avenue	0.00/0.00	Closed, 01/11/1990	03-41-000504

Hertz Car Rental	5300 S Howell Avenue	0.00/0.00	Open, 08/23/2000	03-41-259163
Hertz Car Rental	5300 S Howell Avenue	0.00/0.00	Closed, 07/29/1998	03-41-000944
Mitchell Field/M&I Bank Hangar	1901 Layton Avenue	0.01/77.68	Closed, 12/13/2010	03-41-552248

Activity Number 03-41-113969

This listing is located at Trans World Airlines Inc., Concourse C, and is a closed LUST site as of December 1, 1998. Information regarding location and proximity to the Subject Property is unknown. According to the site file, an unknown amount of unleaded and leaded gasoline was released from a UST. The notification of discharge occurred on December 13, 1996.

Activity Number: 03-41-002352

This listing is located at Northwest Airlines Inc. and is a closed LUST site as of December 13, 1993. Information on location and proximity to the Subject Property is unknown. An unknown amount of antifreeze was released from a UST. The notification of discharge occurred on May 5, 1992.

Activity Number: 03-41-005189

This listing is located at General Mitchell International Airport – Old Fuel Farm and is a closed LUST site with continuing obligations. The site was closed on September 7, 2005, and the notification of discharge occurred on August 29, 1995. Groundwater and soil at this site were contaminated with benzene, benzo(a)pyrene, benzo(b)fluoranthene, and chrysene above the WDNR NR 140 Preventative Action Limit (PAL). The extent of the contamination appears to be limited to the vicinity of the UST and is not likely to have impacted the Subject Property.

Activity Number: 03-41-098832

This listing is located at the General Mitchell International Airport Fuel Farm and is a closed LUST site with continuing obligations. The site was opened on May 5, 1990, and closed on June 7, 2005. Site activities included, soil borings, groundwater monitoring wells, soil excavation of approximately 475 tons of contaminated soil, and remediation systems to extract and separate the fuel product known to have contaminated the site. The extent of the contamination in proximity to the Subject Property along with the direction of groundwater flow indicates that this site is not likely to have impacted the Subject Property.

Activity Number: 03-41-223628

This listing is located at General Mitchell International Airport and is a closed LUST site as of May 26, 2000. This site opened on May 28, 1999, due to the release of jet fuel from an underground UST system. The bulk of the soil contamination was excavated and removed, and there was no evidence of migration or potential migration of residual petroleum free product along piping corridors. Although there was residual contamination on site, the site was closed with no further actions necessary due to the residual contamination not presenting an imminent risk to human health or environmentally sensitive receptors. The extent of the investigation and the proximity

of the site to the Subject Property indicates that this site is not likely to have impacted the Subject Property.

Activity Number: 03-41-001375

This listing is located at General Mitchell International Airport and appears to have taken place at the South Maintenance area. The LUST site has been closed since December 18, 1996. Limited information is available regarding the events of this site and its investigation. On January 1, 1991, a notification of discharge occurred for an unknown amount of an unknown type of petroleum.

Activity Number: 03-41-579844

This listing is located at General Mitchell International Airport and appears to have taken place at a fuel hydrant known as Fuel Hydrant 60C. The LUST site is closed with continuing obligations as of October 5, 2018. The site was opened on May 1, 2017, due to a hydrant valve that was discovered to be leaking jet fuel into a secondary containment pit. The secondary containment pit was breached, and the jet fuel impacted the surrounding soil. The extent of the investigation and the proximity of the site to the Subject Property indicates that this site is not likely to have impacted the Subject Property.

Activity Number: 03-41-113042

This listing is located at General Mitchell International Airport and appears to have taken place at the Unocal Truck Rack. This LUST site was closed with continuing obligations on June 7, 2005. This site investigation was completed in conjunction with the investigation and remediation activities performed for an adjacent site known as the Hydrant Fuel Farm (Activity Number: 03-41-098832). Due to the similarity of the adjacent site investigation and the proximity of the site to the Subject Property, this listing is not likely to have impacted the Subject Property.

Activity Number: 03-41-001178

This listing is located at General Mitchell International Airport and appears to have taken place at the Airport Baggage Claim area. This LUST site was closed on December 18, 1996. The site was opened on November 28, 1990, due to the removal of a 1,500-gallon fiberglass single-wall UST used for fuel oil at the baggage claim facility. Soil and groundwater contamination was initially evident within the vicinity of the UST; however, a pump test was conducted, and no evidence of soil or groundwater contamination was identified. The case was closed with no further action required. Due to the extent of this investigation, the Subject Property is not likely to have been impacted by this site.

Activity Number: 03-41-001179

This listing is located at General Mitchell International Airport and appears to have taken place at the Airport Boiler House. The LUST site has been closed since November 20, 1996. Limited information is available regarding the events of this site and its investigation. On November 28, 1990, a notification of discharge occurred for an unknown amount of an unknown type of petroleum.

Activity Number: 03-41-003704

This listing is located at Avis Car Rental, Mitchell Airport and appears to have taken place at Alamo Rent-A-Car. This LUST site was closed on May 13, 1994. Limited information is available regarding the events of this site and its investigation. Evidence of a gasoline release on the site

was reported to the WDNR on October 18, 1993. No investigation efforts were performed; however, the WDNR determined that no further action was necessary at the site.

Activity Number: 03-41-000511

This listing is located at Avis Car Rental, Mitchell Airport and is a closed LUST site as of January 11, 1990. A soil impact assessment was performed during the removal of a UST, and one sample had concentrations of gasoline above the detection limit. Additional excavation at the base of the pit was successful in removing the impacted soils and no groundwater was observed during excavation. Due to the extent of this investigation, the Subject Property is not likely to have been impacted by this LUST site.

Activity Number: 03-41-000504

This listing is located at Avis Car Rental, Mitchell Airport and is a closed LUST site as of January 11, 1990. This site file provided was identical to the previous listing located at Avis Car Rental, Mitchell Airport (Activity Number: 03-41-098832), and appears to be a duplicate listing. Due to the extent of the investigation, the Subject Property is not likely to have been impacted by this LUST site.

Activity Number: 03-41-259163

This listing is located at Hertz Car Rental and is an open LUST site since August 23, 2000. A discharge was reported from a 10,000-gallon gasoline UST after it was removed on August 22, 2000. The extent and degree of the residual soil contamination was investigated; however, the site remains open due to missing closure documentation. Due to the extent of the investigation, the groundwater flow direction, and the proximity of the site, the Subject Property is not likely to have been impacted by this LUST site.

Activity Number: 03-41-000944

This listing is located at Hertz Car Rental and is a closed LUST site as of July 29, 1998. Petroleum contamination was discovered during the removal of a gasoline UST. Site assessments performed at the site determined the extent and degree of contamination, and an integrated vacuum extraction/air sparging remediation system was used at the facility to further remediate the contamination. The extent of the contamination appears to be limited to the vicinity of the UST, and the contamination appears to have been properly remediated before case closure. Due to the extent of the investigation and the proximity of the site, the Subject Property is not likely to have been impacted by this site.

Activity Number: 03-41-552248

This listing is located at Mitchell Field/M&I Bank Hangar and appears to have taken place at Luetzow Aviation. This LUST site was closed with continuing obligations on December 13, 2010. Levels of Diesel Range Organic (DRO) contamination in the soil at the site were above WDNR Residual Contaminant Levels (RCLs). The investigation performed concluded that the contaminant plume is stable or receding and will naturally attenuate over time. The plume appears to be limited to the vicinity of the previous UST adjoining the hangar, and an Engineered Cap and Building Barrier Maintenance Plan was created for the location of contamination. Due to the extent of the investigation and proximity of the site, the Subject Property is not likely to have been impacted by this LUST site.

Activity Number: 03-41-544905

This listing is located at Siedatas Service and is a closed LUST site with continuing obligations as of January 1, 2007. A site investigation was performed to determine the extent and degree of petroleum contamination. The contamination at this site appears to be limited to the vicinity of the source, and excavated soil was removed and disposed. Contamination remained on site during closure, however, due to the proximity of the site and the extent of the investigation, the Subject Property is not likely to have been impacted by this listing.

Additional LUST sites were identified outside of a 0.12-mile radius of the Subject Property; however, due to the proximity of these sites to the Subject Property, they are not likely to have impacted the Subject Property and detailed information regarding these LUST sites have been omitted from this report.

11.2.5 State/Tribal Delisted LST

The WDNR *Delisted Leaking Tanks* database (DELISTED LST) was reviewed. 26 sites located on the Subject Property are listed on the DELISTED LST database. Additionally, 8 sites located within 0.25 mile and 9 sites located within 0.50 mile of the Subject Property are listed on the DELISTED LST database. Due to the nature of the listings included on this database, detailed information has been omitted from this report, and listings included on this database are not likely to have impacted the Subject Property.

11.2.6 State/Tribal VCP

The WDNR *Voluntary Investigation and Cleanup Program* and the USEPA *Voluntary Cleanup Priority Listing* (collectively referred to as VCP) were reviewed. The Subject Property is not included on the VCP. In addition, no VCP sites are located within 0.50 mile of the Subject Property.

11.2.7 State/Tribal IC/EC

The WDNR *database* of Land Use Controls was reviewed. The Subject Property is not included on the Land Use Controls database.

11.2.8 State/Tribal BRRTS

The WDNR *Bureau of Remediation and Redevelopment Tracking System* (BRRTS) database was reviewed. 4 sites and 7 listings on the Subject Property are listed on the BRRTS database. The following table summarizes the BRRTS database information provided:

Site Name	Address	Activity Number	Activity Type	Comments
General Mitchell Int’nl – Airtran Airways	5300 S Howell Ave	08-41-560701	Abandoned Container	Closed as of July 11, 2013. Medical/infectious substances including 2 gel packs and 2 petri dishes were located. Disposed of at Veolia.
Northwest Airlines Inc	5300 S Howell Ave	09-41-557140	No Action Required	Tank System Site Assessment performed in May 2011 at the General Mitchell International Airport Maintenance Garage. No evidence of contamination from lab analysis results.

General Mitchell International Airport	5300 S Howell Ave	09-41-262107	No Action Required	Previous LUST listing (Activity No: 03-41-262107). Tank remains were located during construction efforts at the Airport HVAC Building. No evidence of a significant release was provided.
General Mitchell International Airport	5300 S Howell Ave	09-41-560100	No Action Required	Tank System Site Assessment was performed on December 2, 2013, during the removal of a 1,000-gallon diesel fuel UST. Based on observations and analytical results, there does not appear to have been a release from the UST system that would warrant additional action.
General Mitchell International Airport	5300 S Howell Ave	09-41-561434	No Action Required	Related to activities from previous listing (Activity No: 09-41-560100). Possible duplicate listing.
General Mitchell International Airport	5300 S Howell Ave	09-41-292406	No Action Required	Site Assessment for Underground Storage Tank System was performed in October 1996 at the Everbrite Hangar. No evidence of contamination from lab analysis results.
General Mitchell International Airport	5300 S Howell Ave	09-41-291926	No Action Required	Site Assessment for Underground Storage Tank Removal was performed on May 20, 1997, during the removal of 2 30,000-gallon USTs. Based on observations and analytical results, there does not appear to have been a release from the USTs.

11.2.9 State/Tribal ERP

The WDNR *Environmental Repair Program* database (ERP) was reviewed. 3 sites and 5 listings located on the Subject Property are listed on the ERP database. The following list summarizes the information for each site listed on the ERP database.

Activity Number: 02-41-270038

This site is located at General Mitchell International Airport and is listed as a closed ERP site with continuing obligations as of January 1, 2018. The address associated with this listing is 5300 S Howell Avenue. Investigation efforts determined that petroleum contamination at this site was limited to the vicinity of the source property. Due to the extent of the investigation and the proximity of the site, the Subject Property is not likely to have been impacted by this listing.

Activity Number: 02-41-558334

This site is located at Northwest Airlines Inc. and is listed as a closed ERP site with continuing obligations as of May 19, 2015. The address associated with this listing is 5300 S Howell Avenue. Investigation efforts at this site determined that jet fuel leaking from an underground pipeline system impacted groundwater and soil conditions at the site. Investigation efforts included the excavation of impacted soil; however, a relatively small amount of impacted soil was not excavated due to the proximity of the 250-foot offset for the main north-south runway. The extent of the investigation indicated that contamination is limited to the vicinity of the source.

After review of site file associated with this listing, it appears that the contamination likely occurred within the boundaries of the Subject Property and the Subject Property may have been impacted by the activities associated with this listing.

Activity Number: 02-41-000687

This site is located at Northwest Airlines Inc. and is listed as a closed ERP site as of April 23, 2004. The address associated with this listing is 5300 S Howell Avenue. Limited information about the location of contamination is available for this site; however, the substances listed on file include petroleum products, metals, Resource Conservation and Recovery Act (RCRA) Subtitle C Wastes, and Volatile Organic Compounds (VOCs). This listing is included with another ERP listing within the same facility (Facility ID Number: 241336370) previously discussed as Northwest Airlines Inc. (Activity Number: 02-41-558334), However, the exact location of the contamination source was unknown.

Activity Number: 02-41-261592

This site is located at General Mitchell International Airport and is listed as an open ERP as of December 20, 2000. The address associated with this listing is 5300 S Howell Avenue. Historically, the site was a clay-lined fire training pit established in the mid-1980s and was used by the General Mitchell Fire Department to conduct fire suppression training activities. Due to the extent of the investigation and the proximity of the site, the Subject Property is not likely to have been impacted by this ERP listing.

Activity Number: 02-41-584547

This site is located at General Mitchell International Airport and is listed as an open ERP as of October 11, 2019. The address associated with this listing is 5300 S Howell Avenue. The investigation consists of sampling multiple areas on the General Mitchell International Airport property for contamination due to aqueous film forming foam (AFFF) used for fire suppression. Due to the proximity of the areas investigated, the Subject Property is not likely to be impacted by this listing.

Additionally, 5 ERP sites were identified within 0.25 mile of the Subject Property and 1 ERP site was identified within 0.50 mile of the Subject Property; however, due to the proximity of these sites to the Subject Property, they are not likely to have impacted the Subject Property and detailed information regarding these ERP sites have been omitted from this report.

11.2.10 State/Tribal Brownfields

The WDNR Eligible *Brownfields Properties* database (Brownfields) was reviewed. The following site located on the Subject Property was listed on the Brownfields database:

Activity Number: 07-41-583889

This site is listed as General Mitchell International Airport and is located at 5300 S Howell Avenue. The start date of this Brownfields listing is July 3, 2019. According to the site file for this listing, hazardous substance discharges have occurred on the property. The location of this determination is southwest of the Subject Property and is located near an area that was used for a 5,000-car parking structure expansion. Site activities concluded that no evidence has been provided that a significant release associated with fuel tanks found underground during the expansion occurred, and the WDNR required no investigation of the site. Due to the extent of

the investigation and the proximity of the site, the Subject Property is not likely to have been impacted by this site.

11.2.11 State/Tribal Spills

The DNR Database of Spill Cases (SPILLS) was reviewed. 162 spills associated with 24 sites were listed on the Subject Property on the reviewed SPILLS database. The following table summarizes the SPILLS databased information provided:

Site Name	Activity Number	Site Address	Status	General Location	Type/Amount	Cleanup Method
General Mitchell Blvd & National Ave	04-41-549791	General Mitchell Blvd & National Ave	Closed, 01/24/2007	General Mitchell Blvd & National Ave Intersection	10 Gallons – Hydraulic Oil	Absorbent, Excavation
5300 S Howell – Gate 67	04-41-044431	5300 S Howell – Gate 67	Historic, 02/26/1990	Gate 67	80 Gallons – Jet Fuel	Absorbent
Mitchell Field Airport	04-41-044891	Mitchell Field Airport	Historic, 07/12/1990	Not Provided	50 Gallons – Unleaded and Leaded Gasoline	Absorbent
GMIA Fuel Facility	04-41-052334	5300 S Howell Ave	Historic, 05/23/1991	Not Provided	180 Gallons – Unleaded and Leaded Gasoline	Absorbent

11.3 Federal Sources

11.3.1 Federal NPL

The USEPA *National Priorities List* (NPL) database was reviewed. The Subject Property is not included within this listing. In addition, no NPL sites are reported within 1.0 mile of the Subject Property.

11.3.2 Federal Delisted NPL

The USEPA *Delisted NPL* database was reviewed. The Subject Property is not included within this listing. In addition, no Delisted NPL sites are reported within 0.50 mile of the Subject Property.

11.3.3 Federal Superfund ROD

The Superfund Record of Decision (ROD) database, which includes sites where changes have been made to Superfund cleanup plans, was reviewed. The Subject Property is not included on this database. In addition, no Superfund ROD sites are located within 1.0 mile of the Subject Property.

11.3.4 Federal CERCLIS

The USEPA *Comprehensive Environmental Response, Compensation and Liability Information System* (CERCLIS) database was reviewed. The Subject Property is not included within this listing. In addition, no CERCLIS sites are reported within 0.50 mile of the Subject Property.

11.3.5 Federal CERCLIS NFRAP

The USEPA *CERCLIS No Further Remedial Action Planned* (NFRAP) database was reviewed. The Subject Property is not included within this listing. In addition, no NFRAP sites are reported within 0.50 mile of the Subject Property.

11.3.6 Federal SEMS

The *Superfund Enterprise Management System* (SEMS), which includes active sites that are proposed to be on or are on the NPL, was reviewed. The Subject Property is not included on the SEMS database. In addition, no SEMS sites are reported within 0.50 mile of the Subject Property.

11.3.7 Federal SEMS Archive

The SEMS Archive database, which includes sites that have been removed from the NPL, was reviewed. The Subject Property is not included on the SEMS Archive. In addition, no SEMS Archive site was located within 0.50 mile of the Subject Property.

11.3.8 Federal RCRA TSD

The USEPA *Resource Conservation and Recovery Information System* (RCRA) *Treatment, Storage, and/or Disposal Facilities* (RCRA TSD) database was reviewed. The Subject Property is not included within this listing. In addition, no RCRA TSD sites are reported within 0.50 mile of the Subject Property.

11.3.9 Federal RCRA COR

The USEPA RCRA *Corrective Action Sites* (RCRA COR) database was reviewed. The Subject Property is not included within this listing. However, 2 RCRA COR sites are reported within 1.0 mile of the Subject Property. Due to the proximity of the listings and the scope of this project, the RCRA COR listings are not likely to have impacted the Subject Property.

11.3.10 Federal RCRA GEN

The USEPA RCRA-*Large and Small Quantity Generators* (RCRA GEN) database was reviewed. The Subject Property included 9 listings on the RCRA GEN database. Of the 9 listings, 2 were listed as RCRA Small Quantity Generators (SQG), 3 were listed as RCRA Very Small Quantity Generators (VSQG) and 4 were listed as RCRA Non-Generators (NON GEN). Additional waste code details can be found in the ERIS *Database Report* enclosed in Appendix 10. The following table summarizes the RCRA GEN database information:

Company Name	Site Address	Status	Waste Codes
Hertz Rental SVC	5300 S Howell Ave Site C	NON GEN	D001 – Ignitable Waste D018 - Benzene
Former Continental Air Lines	5300 S Howell Ave B	NON GEN	D001 – Ignitable Waste D002 – Corrosive Waste
Northwest Airlines Inc	5300 S Howell Ave	NON GEN	D001 – Ignitable Waste
General Mitchell Int’nl – Airtran Airways	5300 S Howell Ave – Gate C24	NON GEN	D035 – Methyl Ethyl Ketone F003 – Spent Nonhalogenated Solvents D001 Ignitable Waste F001 – Spent Halogenated Solvents F005 – Spent Nonhalogenated Solvents
Delta Airlines	5300 S Howell Ave	VSQG	D001 – Ignitable Waste D018 – Benzene F003 – Spent Nonhalogenated Solvents F005 – Spent Nonhalogenated Solvents
Trans World Airlines	5300 S Howell Ave	VSQG	F001 – Spent halogenated Solvents F005 – Spent Nonhalogenated Solvents
American Eagle Airlines	5300 S Howell Ave Gen Mitchell	VSQG	F002 – Spent Halogenated Solvents F003 – Spent Nonhalogenated Solvents F005 – Spent Nonhalogenated Solvents F035 – Wastewaters, Process Residuals, Preservative Drillage, and Spent Formulations from Wood Preserving Processes Generated at Plants that use Inorganic Preservatives Containing Arsenic or Chromium D001 – Ignitable Waste D006 – Cadmium

			D007 – Chromium D008 – Lead D018 – Benzene D035 – Methyl Ethyl Ketone
General Mitchell International Airport	5300 S Howell Ave	SQG	D001 Ignitable Waste D002 – Corrosive Waste
TSA @ General Mitchell Int'l (MKE)	5300 S Howell Ave STE 200	SQG	D001 – Ignitable Waste D002 – Corrosive Waste D003 – Reactive Waste U002 – 2-Propanone (l) (or) Acetone (l) D035 – Methyl Ethyl Ketone D007 – Chromium D005 – Barium U154 – Methanol (l) (or) Methyl Alcohol (l) D008 – Lead U080 – Methane, Dichloro- (or) Methylene Chloride D006 – Cadmium D009 – Mercury

11.3.11 Federal ERNS

The USEPA *Emergency Response Notification System* (ERNS) database was reviewed. 9 listings were identified on the reviewed databases on the Subject Property. The following table summarizes the ERNS database information provided:

Site Address	National Response Center Report Number:	Incident Date	Comments
Milwaukee Airport 5300 S Howell Ave, In the Garage	278759	02/05/1995	Plow tractor fuel hose broke. Release was secured and absorbents were applied. 5 square feet of concrete affected.
Mitchell International Gate 33	70479	05/02/1991	6 gallons of jet fuel released from a blown seal on hydrant pit. Absorbent material was used on and around spill to recover it.
Hydrant Fuel Facility at the General Mitchell Airport	21356	05/10/1990	Unknown amount of kerosene was released and entered sewer and nearby river. Diking and damming efforts for cleanup.
General Mitchell Airfield	156924	02/06/1993	4 gallons of jet fuel released from an overfilled aircraft. Absorbent material was used on spill to recover it. According to the report, spilled material may have entered the storm drain.
5300 S Howell Ave	78211	07/06/1991	0.99 gallons of automotive gasoline was released due to equipment

			being tipped. Spill was cleaned up using rags.
5300 S. Howell Ave	1001977	01/31/2012	Update to Report Number 1001807. Reported 215 Barrels of jet fuel released from unknown source and entering unnamed creek. Responders placed booms in creek.
5300 S. Howell Ave	1001807	01/31/2012	Caller reported release of jet fuel from an unknown source. Update report is included in Report Number 1001977.
General Mitchell Airport 5300 South Hollow Ave	1001284	01/23/2012	Caller reported discharge of jet fuel from the airport fuel farm due to unknown causes. Approximately 100 gallons of jet fuel was discharged. According to report, discharge entered the storm sewer and Wilson Park Creek. Booms were deployed for containment.
Mitchell International Airport 3500 South Howell Ave	625542	10/10/2002	Jet fuel spill occurred due to replacement of pipelines. Unknown quantity of discharge.

11.3.12 Federal IC and EC Brownfield Management System

The USEPA *Brownfield Management System* (BMS) database of sites with IC and EC was reviewed. The Subject Property is not included within this listing.

12.0 Findings and Opinions

- The Subject Property consists of a portion of the parcel owned by Milwaukee County Airport and the airport associated to the property operates under the name Milwaukee Mitchell International Airport. The Subject Property is approximately 3.00 sq. mi. and is situated on the county tax parcel 6409999120 in the City of Milwaukee, Milwaukee County, Wisconsin.
- An airport runway was observed on the Subject Property and intersects several runways and access roads. Additionally, the Subject Property consists of some taxiway just south of middle of the Subject Property runway. Historical documentation suggests that the Subject Property runway was initially unpaved and occupied the northern portion of the Subject Property. The existing runway on the Subject Property appears to have been paved and extended sometime between 1937 and 1941. The southern portion of the Subject Property was primarily agricultural land until airport operations expanded in the 1940s.
- The surrounding area to the Subject Property is primarily used for airport operations with residential and commercial land adjoining the airport property. A National Guard refueling wing is located on the southern-southeastern adjoining property to the Subject Property. In the general southwestern direction is the primary airport operations of the Milwaukee Mitchell International Airport.
- The Subject Property and was included on multiple reviewed databases; however, after review of the detailed listings, the location of these listings appeared to consist of the general Milwaukee Mitchell International Airport property and not the specific location of the Subject Property. For this reason, each listing was reviewed to identify the proximity of the listing to the Subject Property and determine if areas of environmental concern with respect to the Subject Property exist.
 - The Aboveground and Underground Storage Tank database listing details were reviewed and are described in section 11.2.3 of this report. Due to the regulatory status of the tanks, type of tank, presumed distance to the tanks, and/or the scope of work for this proposed project, these listings are not considered a REC with respect to the Subject Property.
 - Leaking Underground Storage Tank case files were reviewed on the BRRTS on the Web website and are described in section 11.2.4 of this report. Due to the regulatory status of the cases, proximity of the contamination, extent of the investigations, intervening soils, groundwater flow direction and/or the scope of the proposed project, these listings are not considered to be a REC with respect to the Subject Property.
 - Additional BRRTS sites were found while searching the BRRTS on the Web website. Their case files were reviewed and described in section 11.2.8 of this report. Due to the regulatory status of the cases, proximity of the contamination, extent of the investigations, intervening soils, groundwater flow direction and/or the scope of the proposed project, these listings are not considered to be a REC with respect to the Subject Property.
 - Environmental Repair Program case files were reviewed on the BRRTS on the Web website and are described in section 11.2.9 of this report. Due to the proximity of the contamination, extent of the investigations, intervening soils, groundwater flow direction and/or the scope of the proposed project, these listings are not considered to be a REC with respect to the Subject Property.
 - Brownfield listings were viewed by searching their case files on the BRRTS on the Web website and details are described in section 11.2.10 of this report. Due to the proximity of the contamination, extent of the investigations, intervening soils, groundwater flow direction and/or the scope of the proposed project, these listings are not considered to be a REC with respect to the Subject Property.

- Spills database listings were viewed by searching their case files on the WDNR Spills database, details were reviewed and are described in section 11.2.11 of this report. Due to the regulatory status of the cases, proximity of the release, quantity of released product, method of cleanup extent of the investigations, intervening soils, groundwater flow direction and/or the scope of the proposed project, these listings are not considered to be a REC with respect to the Subject Property.
- The RCRA Hazardous Materials Generator database was reviewed, details were provided by ERIS. Waste codes and facility statuses are described in section 11.3.10 of this report. These listings are assumed to be associated to adjoining property operations and not the Subject Property. As such, these listings are not considered to be a REC with respect to the Subject Property.
- Adjoining properties were listed on the reviewed databases. However, due to the regulatory status of the cases, proximity of the contamination/listing, extent of the investigations, intervening soils, groundwater flow direction and/or the scope of the proposed project, these listings are not considered to be a REC with respect to the Subject Property.
- After reviewing the site files on the reviewed databases for proximity to the Subject Property, one listing was identified to be located on the Subject Property. The listing on the ERP database was noted as closed with continuing obligations and a review of the site investigation documentation on BRRS site (Activity No: 02-41-558334) showed soil impacts still in the subsurface. This release was known to be caused by a leaking underground piping system releasing jet fuel. Investigation efforts included the excavation of impacted soil; however, a relatively small amount of impacted soil was not excavated due to the proximity of the 250-foot offset for the main north-south runway. This remaining impacted soil may be located within the boundaries of the Subject Property. Due to the fact that soil contamination remains on the site, this previous release is a CREC with respect to the Subject Property; however, the scope of this runway removal project indicates that this controlled recognized environmental condition is not likely to have any impact on the Subject Property.
- Records were provided by the Milwaukee County Health Department. Records were related to general airport operations such as cleaning restrooms and condition of onsite fountains. The nature of the records was not considered relevant to the scope of this report and are not considered a REC with respect to the Subject Property.
- No significant findings or discoveries were noted during the site reconnaissance or interview.

13.0 Conclusions

A Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Standard Practice E 1527-21 was performed on the Subject Property located a portion of the county parcel 6409999120 in the City of Milwaukee, Milwaukee County, Wisconsin. Any exceptions to, or deletions from, this practice are described within Section 3.2.

This assessment has revealed evidence of one CREC, and no RECs or HRECs in connection with the Subject Property; however, the CREC identified, is not likely to have impacted the proposed scope of the project.

14.0 Data Gaps

Westwood did not request documents from the Milwaukee Building Department as the address of the Subject Property is the same as the Airport Property and many documents not related to the Subject Property would be provided. Similarly, Westwood did not request a City Directory search. Westwood did not receive a response from the Milwaukee Fire Department. In addition, a completed Phase 1 User Questionnaire was not completed and not all database listing files were able to be reviewed; however, based on other information obtained as part of this assessment and proximity of those listings, Westwood does not consider these to be significant data gaps.

15.0 General Comments

No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the property. ASTM International's *Standard Practice E 1527-21* is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the property and recognizes reasonable limits of time and cost.

The term *recognized environmental condition* means the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Conditions determined to be *de minimis* are not *recognized environmental conditions*.

The term *de minimis condition* means a condition that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The term *historical recognized environmental condition* means a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

The term *controlled recognized environmental condition* means a *recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

The term *business environmental risk* means a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice (Phase I ESA ASTM E1527-21). Consideration of business environmental risk issues may involve addressing one or more non-scope considerations.

The term *hazardous substance* is a substance defined as hazardous pursuant to CERCLA 42 USC § 9601(14), and as interpreted by USEPA regulations and the courts.

The term *petroleum products* is defined as those substances included within the meaning of the petroleum exclusion to CERCLA 42 USC § 9601(14), as interpreted by the courts and USEPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of CERCLA 42 USC § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

The services described in this report were performed consistent with generally accepted professional consulting principles and practices and in accordance with the practices and service scope elements recommended by ASTM International for a Phase I ESA with the exception of a chain-of-title/activities & use limitations review. No other warranty, expressed or implied, is made. These services were performed consistent with our agreement with our client. This report is solely for the use and information of our client or as otherwise noted. Any unauthorized use of this report is strictly prohibited and assume no liability for any such use.

Westwood prepared this report to aid in the evaluation of recognized environmental conditions of the Subject Property. Conclusions presented in the report are based on available information that pertained to the Subject Property at various points in time. The information may have been provided to us by others or acquired through discussions with various governmental or agency personnel. The credibility of others was relied on and do not independently verify or warrant the accuracy of information or test results they supply. Any alteration in the documentation, facts, or verbal information obtained may result in a modification or redirection of the conclusions presented in this report.

Conclusions in this report are based on visual field observations performed within the property boundaries and our record review at a specific point in time. Environmental conditions may exist at the Subject Property that could not be identified by visual observation, including potential hazardous substances present within undocumented fills on the subject or adjoining properties.

16.0 Submittal Certification

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR § 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Project Area. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Resumes are included within Appendix 2.

EXPERIENCE

Mr. Dujardin is a scientist/hydrogeologist with the environmental department. He has experience including conducting Phase I & II Environmental Site Assessments (ESAs), NR700 Site Investigations, Vapor Investigations and Remediation. He has also assisted with the screening of stormwater outfalls and the tracking of potential illicit discharges.

Specific project experience includes the following:

Environmental Investigations

Lawrence University – Phase I ESA, City of Appleton, Wisconsin. Conducted a Phase I ESA on the property by reviewing environmental records, historical data, conducted interviews, and carried out a physical site inspection of the property.

McDonalds Ltd. / Chick-Fil-A / Jiffy Lube – Phase I & II ESA, Dozens of Locations throughout Wisconsin, and the County. Conducted Phase I ESAs as described above. Conducted Phase II ESAs of various historical commercial properties which identified environmental issues such as underground storage tanks, contaminated fill material, leaking grease traps, and contaminated septic fields. Phase II ESAs included historic review of a site and target sampling of groundwater, soil, and soil vapor according to the expected contamination. These Phase II ESAs identified multiple contaminated sites from petroleum products, parts cleaner solvents, and miscellaneous fill contamination.

Former Trinity Lutheran Church – Site Closure, Appleton, Wisconsin. Completed and submitted the documentation required for closure of the Wisconsin Department of Natural Resources (WDNR) site investigation of a former vocational school constructed within a former ravine system. The site investigation identified petroleum contaminants and metals in the soil and groundwater on the property and required continuing obligations in the form of a cap maintenance plan.

Lower Telulah Park – Site Closure, Appleton, Wisconsin. Completed and submitted the documentation required for closure of the WDNR site investigation of a former railway. Remedial design included the excavating a small portion of highly impacted soils to be disposed at a Wisconsin Department of Natural Resources (DNR) licensed landfill for disposal, while the remaining low impacted soils were contained on-site within a berm. Installed NR 141 groundwater monitoring wells to determine the extent and degree of groundwater contamination. Then abandoned wells per Wisconsin administrative code.

222 N. Oneida Street – Site Investigation / Site Closure, Appleton, Wisconsin. Remediated a former gas station. Remedial design included the excavating contaminated materials and confirmation sampling. Installed NR 141 groundwater monitoring wells to determine the extent and degree of groundwater contamination.

Milltown Paper – Site Closure, Neenah, Wisconsin. Completed and submitted the documentation required for closure of the WDNR site investigation of a former gas station. Investigative activities identified petroleum contaminants in the groundwater on the property. Site investigations include the installation of six NR 141 groundwater monitoring wells to define the extent of groundwater contamination at the site. Wells were then abandoned per Wisconsin administrative code.

EXPERIENCE

Mr. Sommer is an environmental engineer with the environmental department. He has experience in conducting Phase I Environmental Site Assessments (ESAs) and NR 700 Site Investigations. He has also assisted with tracking of potential illicit discharges.

Prior to joining Westwood, Tim gained valuable experience working as an environmental engineer intern for a global manufacturing company where he revised Storm Water Pollution Prevention Plans (SWPPPs) and Spill Prevention, Control, and Countermeasure (SPCC) plans at multiple facilities, and assisted with multiple environmental compliance related tasks.

Specific project experience includes the following:

Environmental Investigations

Five Shot RNG at East River Genetics – Phase I ESA, Town of Hudson, South Dakota. Phase I ESA assistance on the property by reviewing environmental records, historical data, and conducting interviews.

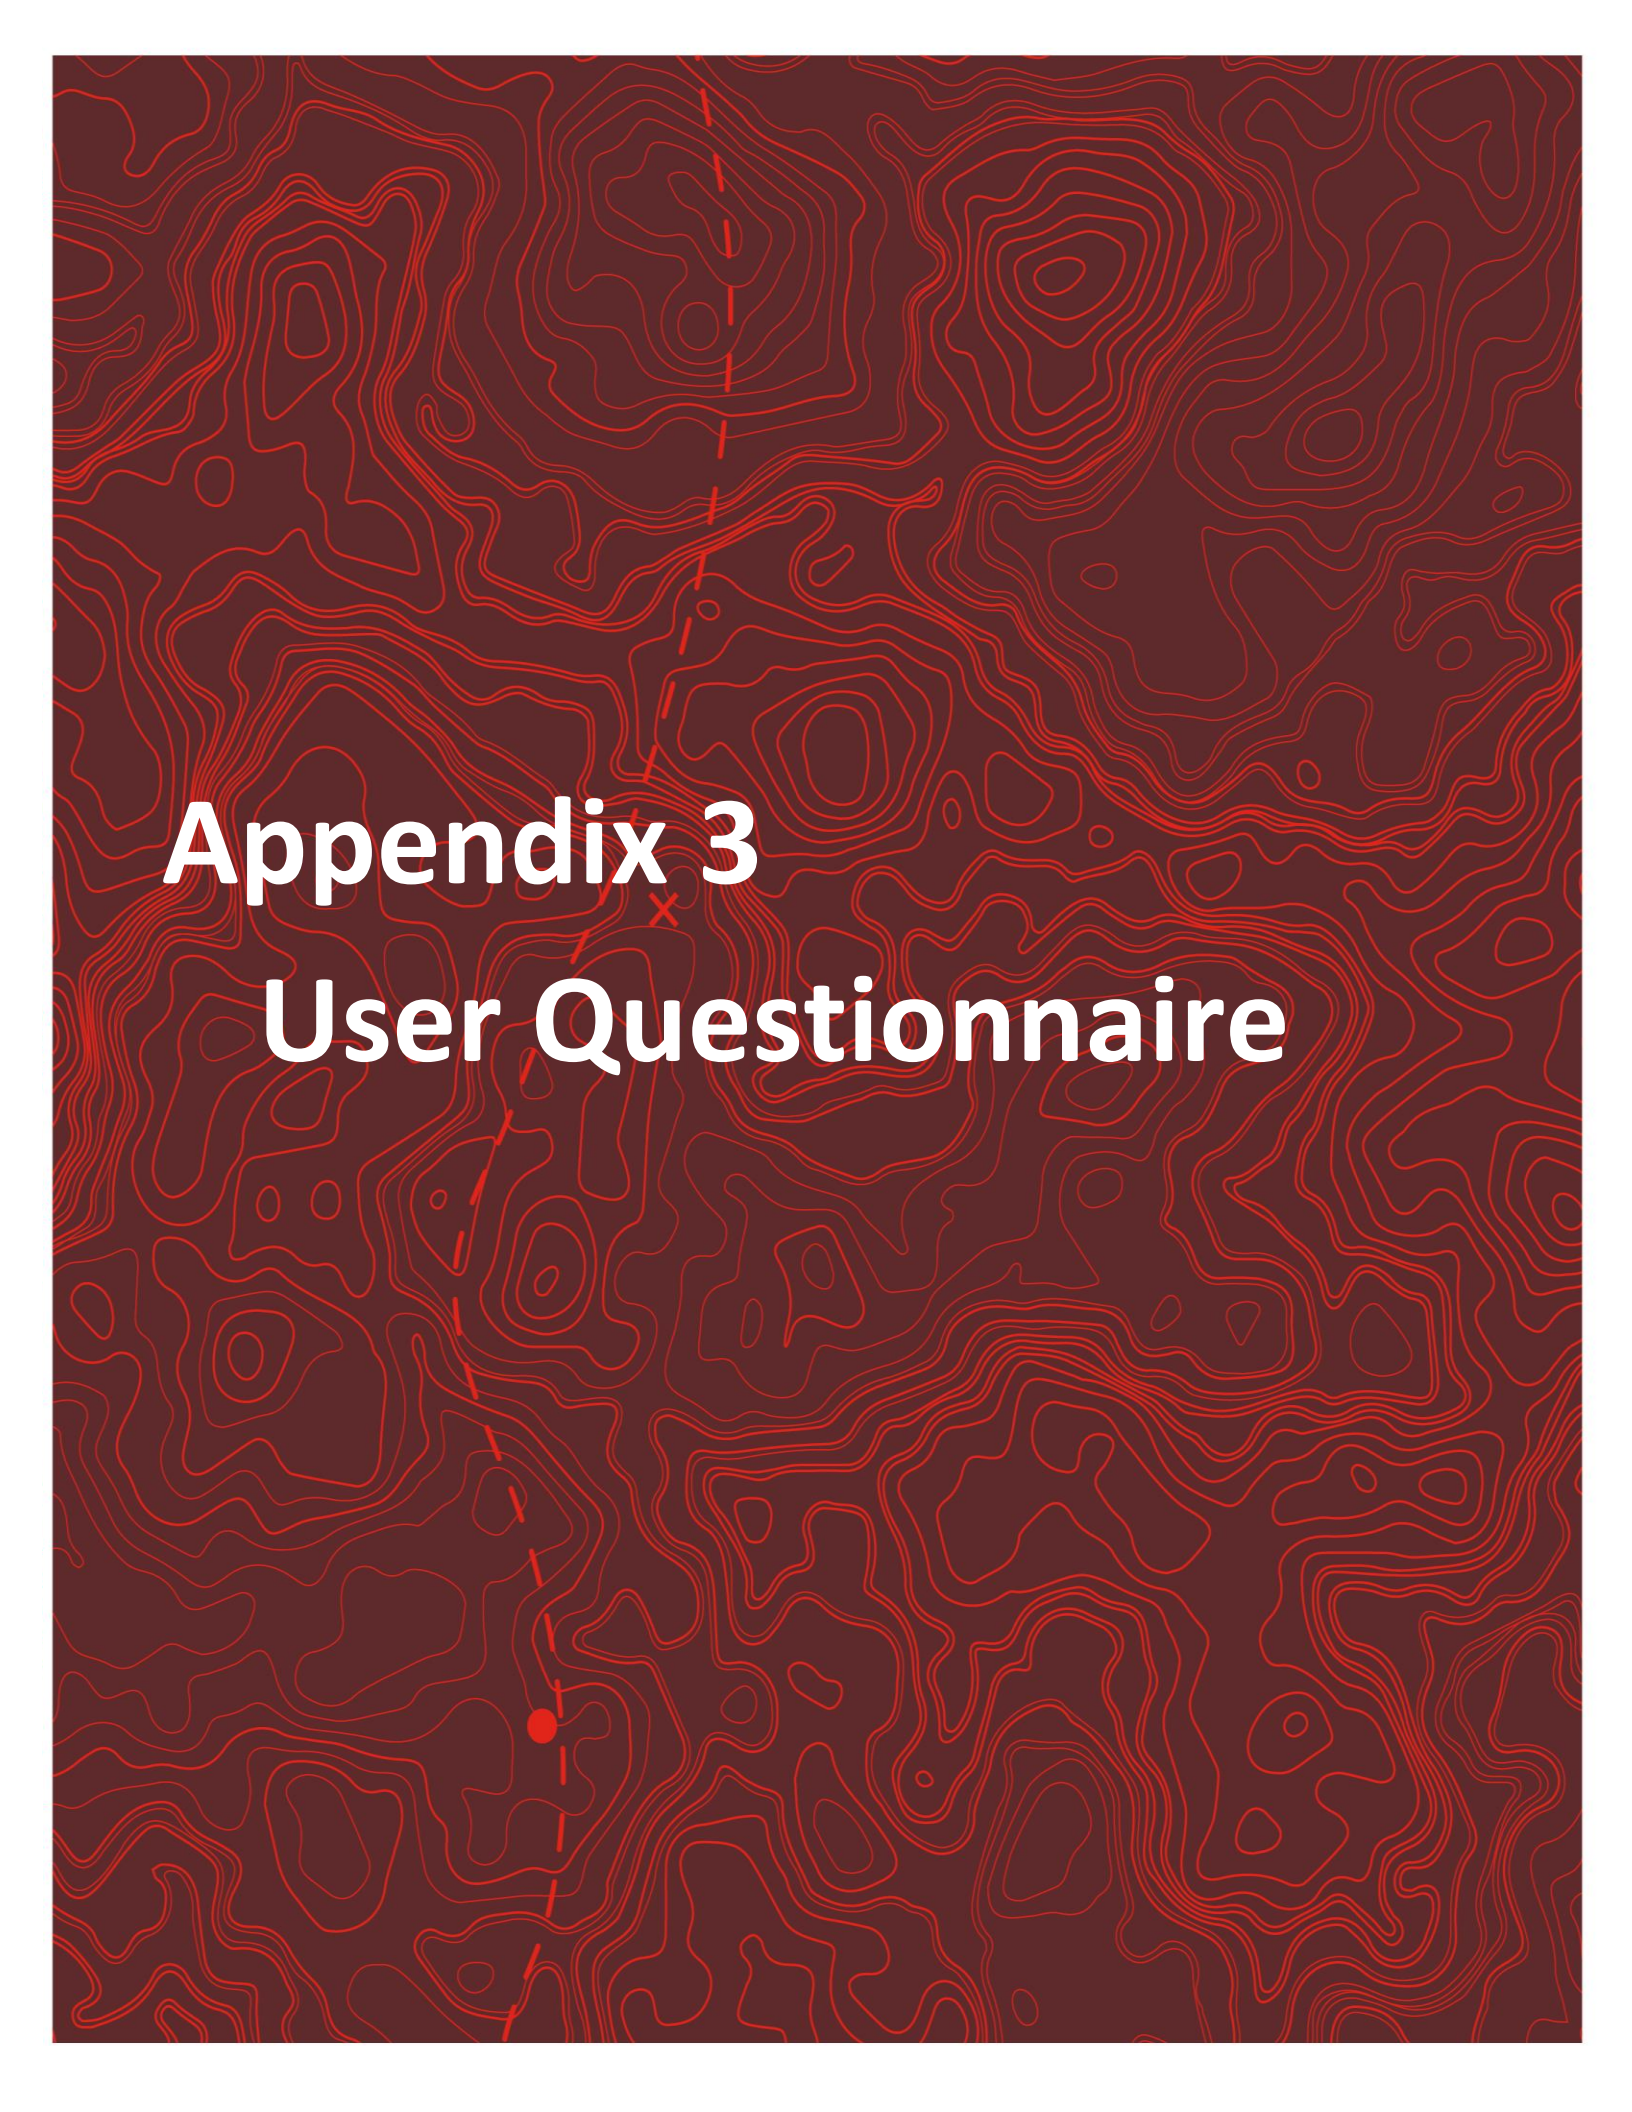

USH 18 1662-00-07 & 1662-00-08 – Phase I Hazardous Materials Assessment Report, Dodgeville, Wisconsin. Conducted a Phase I Hazardous Materials Assessment Report for the Wisconsin Department of Transportation identifying environmental concerns for roadway and infrastructure improvements of the USH 18 corridor.

WisDOT ID 6934-06-03 – Phase I Hazardous Materials Assessment Report, Biron, Wisconsin. Conducted a Phase I Hazardous Materials Assessment Report for the Wisconsin Department of Transportation identifying environmental concerns for roadway improvements of the CTH U corridor.

Moccasin Creek RNG at Warner Dairy – Phase I ESA, Warner, South Dakota. Phase I ESA assistance on the property by reviewing environmental records, historical data, and conducting interviews.

222 N Oneida Street, Valley Premier Property (Former) – Site Investigation, Appleton, Wisconsin. Assisted with the installation, development, and sampling of a groundwater monitoring well to define the extent of groundwater contamination at the site. Also assisted with the Site Investigation reporting.

0 N Appleton Street, Odyssey – Site Investigation, Appleton, Wisconsin. Assisted with the advancement of soil borings and the installations of groundwater monitoring wells for an ongoing Site Investigation. Assisted with soil classifications and sampling.

The background of the page is a dark red color with a complex pattern of lighter red, wavy contour lines, resembling a topographic map. A vertical dashed red line runs down the center of the page. A solid red dot is located on this dashed line in the lower third of the page. A small red 'x' is located on the dashed line in the upper third of the page.

Appendix 3

User Questionnaire

USER QUESTIONNAIRE

When the “user” (the party for whom the assessment is being prepared) of the Phase I is required to help the environmental professional identify recognized environmental conditions at the property, a “User Questionnaire” is completed by the user to help gather information that may identify recognized environmental conditions (RECs) at the property.

We ask that you answer the six (6) questions below to the best of your knowledge. We understand that, in some circumstances, you may have little or no information. Still, we encourage you to complete and return the questionnaire as soon as possible. This will allow us to reflect the fact that the Questionnaire was completed when we issue our report as is required. Completion of the assessment to the new standard, when conducted in connection with the asset purchase of a real property, may entitle the user to certain federal liability protections that result from conducting “All Appropriate Inquires” into the previous ownership and uses of a property.

On the second page of this form is a list of documentation. The E1527-21 Standard requires that the User ensure that the consultant is made aware that any of these materials exist for a site, and if so, that these documents be provided for the consultant’s review. Please indicate whether any of these documents are available and ensure that Environmental Services Company will either receive copies or be provided an opportunity to review the relevant materials.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law? No Yes
2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law? No Yes
3. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? No Yes (if yes please briefly explain on next page or attach records)
4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? No Yes
 - a. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? No Yes
5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,
 - a. Do you know the past uses of the property?
No Yes (if yes please briefly explain on next page or attach records)

- b. Do you know of specific chemicals that are present or once were present at the property?
 No Yes (if yes please briefly explain on next page or attach records)
 - c. Do you know of spills or other chemical releases that have taken place at the property?
 No Yes (if yes please briefly explain on next page or attach records)
 - d. Do you know of any environmental cleanups that have taken place at the property?
 No Yes (if yes please briefly explain on next page or attach records)
6. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?
 No Yes (if yes please briefly explain on next page or attach records)

Further explain any answers requiring clarification or attach records: _____

Helpful Documents Checklist

Do you know whether any of the following documents exist, and if so, whether copies can and will be provided to Westwood Infrastructure, Inc for review?

- Environmental site assessment reports
- Environmental compliance audit reports
- Environmental permits (including but not limited to solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits)
- Registrations for underground and above-ground storage tanks
- Registrations for underground injection systems
- Material safety data sheets
- Community right-to-know plan,
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; facility response plans, etc.
- Reports regarding hydrogeologic conditions on the property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded AULs.

The background of the page is a dark red topographic map. It features intricate, light red contour lines that create a complex, organic pattern across the entire surface. A vertical dashed red line runs down the center-left portion of the map. A small red 'x' is located near the top of this dashed line, and a solid red dot is positioned near the bottom of it.

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

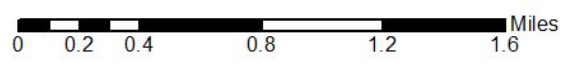

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

FEMA Flood Zone Definitions

Special Flood Hazard Areas – High Risk

Special Flood Hazard Areas represent the area subject to inundation by 1-percent-annual chance flood. Structures located within the SFHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory flood insurance purchase requirements apply in these zones.

ZONE	DESCRIPTION
A	Areas subject to inundation by the 1-percent-annual-chance flood event. Because detailed hydraulic analyses have not been performed, no Base Flood Elevations (BFEs) or flood depths are shown.
AE, A1-A30	Areas subject to inundation by the 1-percent-annual-chance flood event determined by detailed methods. BFEs are shown within these zones. (Zone AE is used on new and revised maps in place of Zones A1–A30.)
AH	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually areas of ponding) where average depths are 1–3 feet. BFEs derived from detailed hydraulic analyses are shown in this zone.
AO	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are 1–3 feet. Average flood depths derived from detailed hydraulic analyses are shown within this zone.
AR	Areas that result from the decertification of a previously accredited flood protection system that is determined to be in the process of being restored to provide base flood protection.
A99	Areas subject to inundation by the 1-percent-annual-chance flood event, but which will ultimately be protected upon completion of an under-construction Federal flood protection system. These are areas of special flood hazard where enough progress has been made on the construction of a protection system, such as dikes, dams, and levees, to consider it complete for insurance rating purposes. Zone A99 may be used only when the flood protection system has reached specified statutory progress toward completion. No BFEs or flood depths are shown.

Coastal High Hazard Areas – High Risk

Coastal High Hazard Areas (CHHA) represent the area subject to inundation by 1-percent-annual chance flood, extending from offshore to the inland limit of a primary front dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources. Structures located within the CHHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory purchase requirements apply in these zones.

ZONE	DESCRIPTION
V	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards associated with storm-induced waves. Because detailed coastal analyses have not been performed, no BFEs or flood depths are shown.
VE, V1-V30	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards due to storm-induced velocity wave action. BFEs derived from detailed hydraulic coastal analyses are shown within these zones. (Zone VE is used on new and revised maps in place of Zones V1–V30.)

Hydrologic Information

Moderate and Minimal Risk Areas

Areas of moderate or minimal hazard are studied based upon the principal source of flood in the area. However, buildings in these zones could be flooded by severe, concentrated rainfall coupled with inadequate local drainage systems. Local stormwater drainage systems are not normally considered in a community's flood insurance study. The failure of a local drainage system can create areas of high flood risk within these zones. Flood insurance is available in participating communities, but is not required by regulation in these zones. Nearly 25-percent of all flood claims filed are for structures located within these zones.

ZONE	DESCRIPTION
B, X (shaded)	Moderate risk areas within the 0.2-percent-annual-chance floodplain, areas of 1-percent-annual-chance flooding where average depths are less than 1 foot, areas of 1-percent-annual-chance flooding where the contributing drainage area is less than 1 square mile, and areas protected from the 1-percent-annual-chance flood by a levee. No BFEs or base flood depths are shown within these zones. (Zone X (shaded) is used on new and revised maps in place of Zone B.)
C, X (unshaded)	Minimal risk areas outside the 1-percent and .2-percent-annual-chance floodplains. No BFEs or base flood depths are shown within these zones. (Zone X (unshaded) is used on new and revised maps in place of Zone C.)

Undetermined Risk Areas

ZONE	DESCRIPTION
D	Unstudied areas where flood hazards are undetermined, but flooding is possible. No mandatory flood insurance purchase requirements apply, but coverage is available in participating communities.

Geologic Information

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

Geologic Information

Geologic Units - Page 1

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

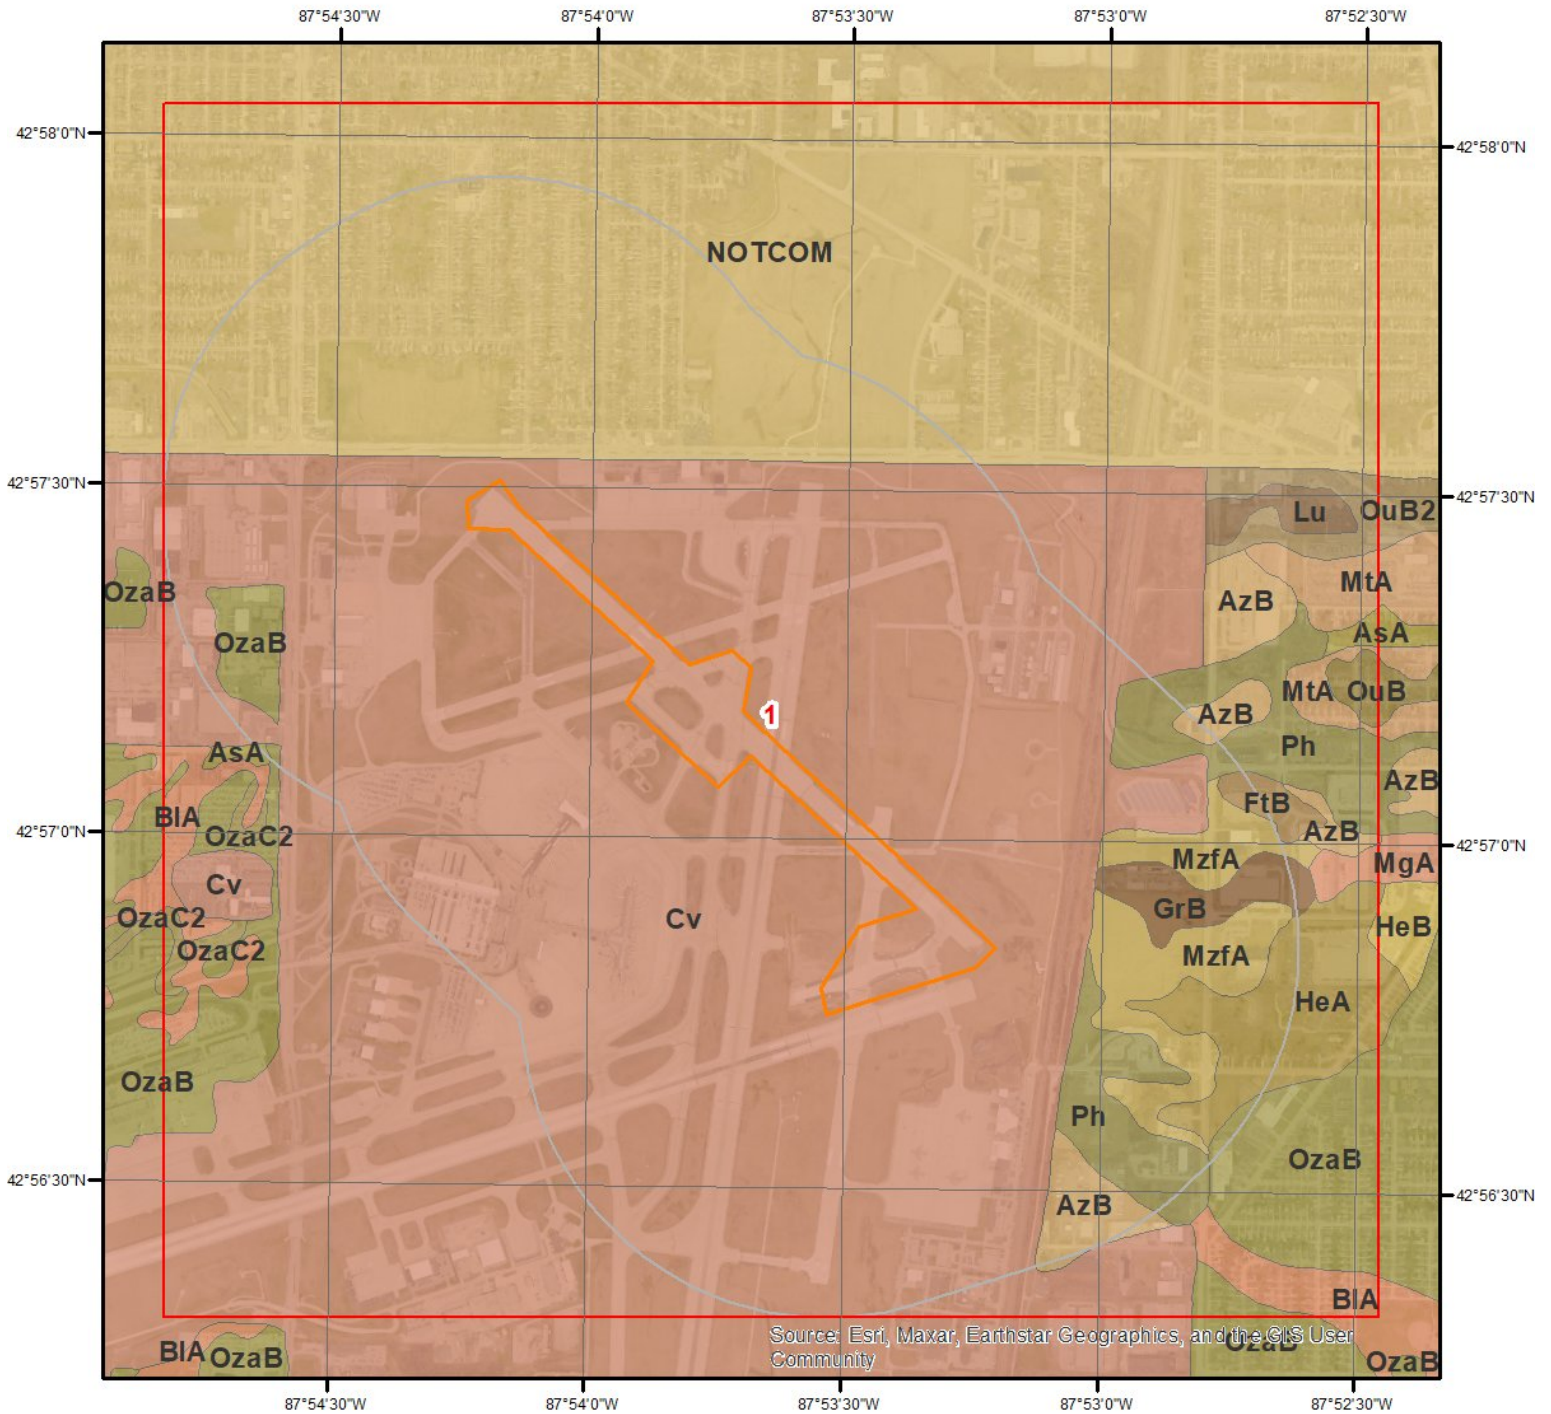

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Su

Unit Name:	Silurian, undivided
Unit Age:	Silurian
Primary Rock Type:	dolostone (dolomite)
Secondary Rock Type:	
Unit Description:	Silurian, undivided - Dolomite, undivided; includes Cayugan, Niagaran, and Alexandrian series

Soil Information

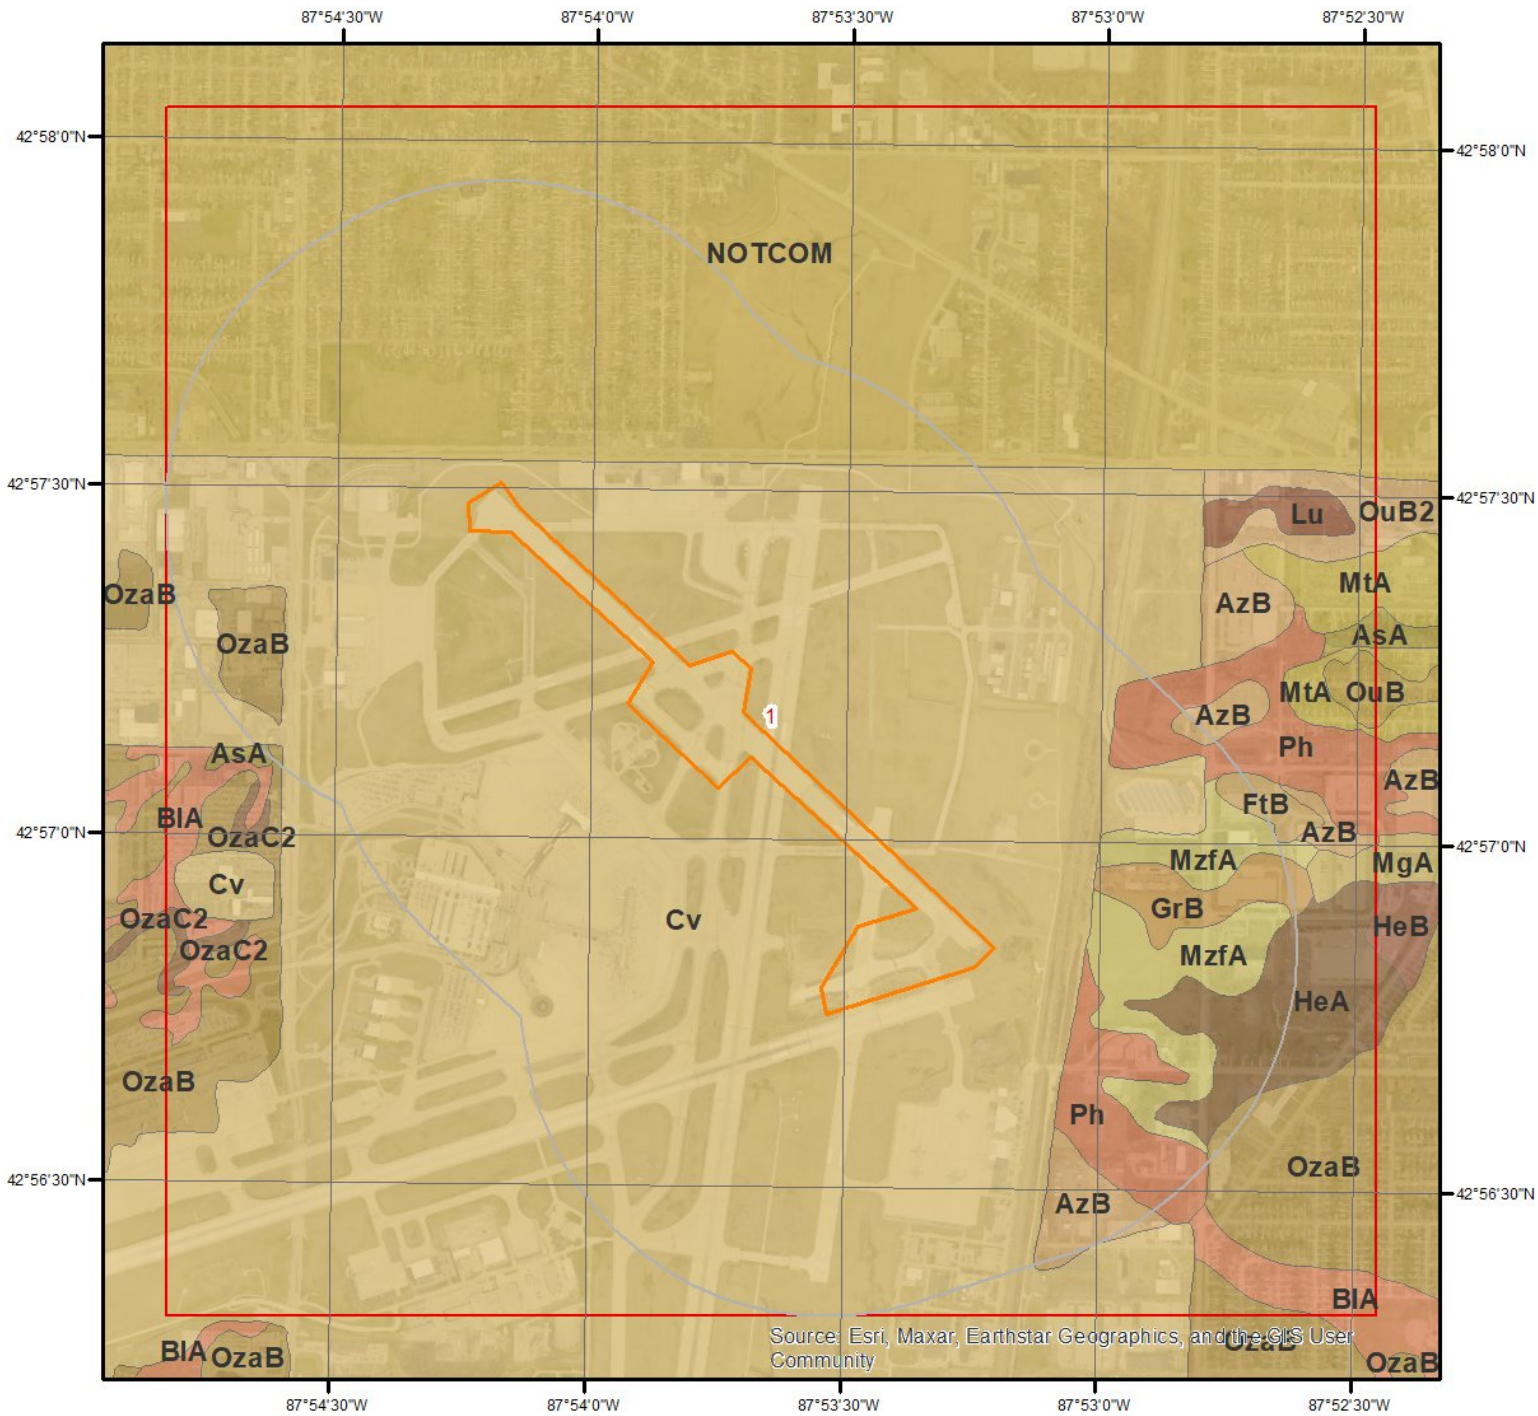

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

SSURGO Soils - Page 1

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit AsA (0.01%)

Map Unit Name:	Ashkum silty clay loam, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	15cm
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	C/D - These soils have moderately high runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Ashkum(92%)	
horizon Ap(0cm to 30cm)	Silty clay loam
horizon Bg1(30cm to 74cm)	Silty clay
horizon 2Bg2(74cm to 137cm)	Silty clay loam
horizon 2Cg(137cm to 152cm)	Silty clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: AsA - Ashkum silty clay loam, 0 to 2 percent slopes

Component: Ashkum (92%)

The Ashkum, drained component makes up 92 percent of the map unit. Slopes are 0 to 2 percent. This component is on ground moraines on uplands. The parent material consists of clayey colluvium over till. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is moderate. This soil is not flooded. It is frequently ponded. A seasonal zone of water saturation is at 6 inches during January, February, March, April, May. Organic matter content in the surface horizon is about 5 percent. This component is in the R110XY024IL Ponded Depressional Sedge Meadow ecological site. Nonirrigated land capability classification is 2w. This soil meets hydric criteria.

Component: Peotone (5%)

Generated brief soil descriptions are created for major soil components. The Peotone, drained soil is a minor component.

Component: Orthents, clayey (2%)

Generated brief soil descriptions are created for major soil components. The Orthents, clayey soil is a minor component.

Component: Urban land (1%)

Generated brief soil descriptions are created for major soil components. The Urban land soil is a minor component.

Map Unit AzB (0.07%)

Map Unit Name:	Aztalan loam, 2 to 6 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	18cm
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	C/D - These soils have moderately high runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Aztalan(90%)	
horizon Ap(0cm to 25cm)	Loam
horizon Bt(25cm to 69cm)	Loam
horizon 2C(69cm to 200cm)	Silty clay loam

Soil Information

Component Description:

Minor map unit components are excluded from this report.

Map Unit: AzB - Aztalan loam, 2 to 6 percent slopes

Component: Aztalan (90%)

The Aztalan component makes up 90 percent of the map unit. Slopes are 2 to 6 percent. This component is on glacial lakes (relict) on basins. The parent material consists of loamy outwash over stratified silty and clayey lacustrine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 7 inches during March, April. Organic matter content in the surface horizon is about 6 percent. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 10 percent. There are no saline horizons within 30 inches of the soil surface.

Component: Navan (6%)

Generated brief soil descriptions are created for major soil components. The Navan soil is a minor component.

Component: Colwood (4%)

Generated brief soil descriptions are created for major soil components. The Colwood soil is a minor component.

Map Unit Cv (7.75%)

Map Unit Name:	Clayey land
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	107cm
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.
Major components are printed below	
Clayey land(90%)	
horizon H1(0cm to 25cm)	Clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Cv - Clayey land

Component: Clayey land (90%)

The Clayey land component makes up 90 percent of the map unit. Slopes are 1 to 12 percent. This component is on cuts (road, railroad, etc.), fills. The parent material consists of clayey mine spoil or earthy fill. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 42 inches during March, April, May, June, July, August, September, October, November. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 7s. This soil does not meet hydric criteria.

Component: Ashkum (10%)

Generated brief soil descriptions are created for major soil components. The Ashkum soil is a minor component.

Map Unit FtB (0.02%)

Map Unit Name:	Fox silt loam, loamy substratum, 2 to 6 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained

Soil Information

Hydrologic Group - Dominant:

B - Soils in this group have moderately low runoff potential when thoroughly wet. Water transmission through the soil is unimpeded.

Major components are printed below

Fox(100%)

horizon Ap(0cm to 20cm)

Silt loam

horizon Bt(20cm to 81cm)

Clay loam

horizon BCt(81cm to 97cm)

Stratified g to sand

horizon 2C(97cm to 152cm)

Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: FtB - Fox silt loam, loamy substratum, 2 to 6 percent slopes

Component: Fox (100%)

The Fox component makes up 100 percent of the map unit. Slopes are 2 to 6 percent. This component is on outwash plains. The parent material consists of loamy alluvium over sandy and gravelly outwash over loamy outwash. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the F110XY011IL Dry Glacial Drift Upland Forest ecological site. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 25 percent.

Map Unit GrB (0.06%)

Map Unit Name:

Grays silt loam, 2 to 6 percent slopes

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Well drained

Hydrologic Group - Dominant:

B - Soils in this group have moderately low runoff potential when thoroughly wet. Water transmission through the soil is unimpeded.

Major components are printed below

Grays(100%)

horizon Ap(0cm to 18cm)

Silt loam

horizon BE,Bt,BC(18cm to 66cm)

Silty clay loam

horizon C1,C2(66cm to 152cm)

Stratified very fine sandy loam to silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: GrB - Grays silt loam, 2 to 6 percent slopes

Component: Grays (100%)

The Grays component makes up 100 percent of the map unit. Slopes are 2 to 6 percent. This component is on lakebeds (relict). The parent material consists of loess over calcareous, stratified sandy and silty lacustrine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 3 percent. This component is in the R110XY009IL Dry Glacial Drift Upland Savanna ecological site. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 25 percent.

Map Unit HeA (0.19%)

Map Unit Name:

Hebron loam, 0 to 2 percent slopes

Soil Information

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Well drained

Hydrologic Group - Dominant:

C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Hebron(100%)

horizon Ap(0cm to 23cm)

Loam

horizon BA,Bt1,Bt2(23cm to 69cm)

Clay loam

horizon 2Bt3(69cm to 81cm)

Silty clay loam

horizon 2C(81cm to 152cm)

Silty clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: HeA - Hebron loam, 0 to 2 percent slopes

Component: Hebron (100%)

The Hebron component makes up 100 percent of the map unit. Slopes are 0 to 2 percent. This component is on lakebeds (relict). The parent material consists of loamy outwash over calcareous clayey lacustrine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 2s. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 20 percent.

Map Unit MzfA (0.18%)

Map Unit Name:

Mundelein silt loam, 0 to 3 percent slopes

Bedrock Depth - Min:

Watertable Depth - Annual Min:

50cm

Drainage Class - Dominant:

Somewhat poorly drained

Hydrologic Group - Dominant:

B/D - These soils have moderately low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Mundelein(85%)

horizon Ap(0cm to 28cm)

Silt loam

horizon Bt(28cm to 66cm)

Silty clay loam

horizon 2C(66cm to 200cm)

Stratified fine sand to silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: MzfA - Mundelein silt loam, 0 to 3 percent slopes

Component: Mundelein (85%)

The Mundelein component makes up 85 percent of the map unit. Slopes are 0 to 3 percent. This component is on lakebeds (relict) on lake plains. The parent material consists of fine-silty lacustrine deposits over sandy and silty lacustrine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 20 inches during January, February, March, April, May, December. Organic matter content in the surface horizon is about 5 percent. This component is in the R110XY007IL Moist Glacial Drift Upland Prairie ecological site. Nonirrigated land capability classification is 2w. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.

Component: Pella (8%)

Generated brief soil descriptions are created for major soil components. The Pella soil is a minor component.

Soil Information

Component: Poygan (7%)

Generated brief soil descriptions are created for major soil components. The Poygan, occasionally ponded soil is a minor component.

Map Unit NOTCOM (86.39%)

Map Unit Name: No Digital Data Available

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Map Unit: NOTCOM - No Digital Data Available

Component: NOTCOM (100%)

The NOTCOM component makes up 100 percent of the map unit. Slopes are Depth to a root restrictive layer is greater than 60 inches. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches.

Map Unit OzaB (5.0%)

Map Unit Name: Ozaukee silt loam, 2 to 6 percent slopes

Bedrock Depth - Min:

Watertable Depth - Annual Min: 69cm

Drainage Class - Dominant: Moderately well drained

Hydrologic Group - Dominant: C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Ozaukee(93%)

horizon Ap(0cm to 15cm)	Silt loam
horizon E(15cm to 20cm)	Silt loam
horizon Bt1(20cm to 30cm)	Silty clay loam
horizon 2Bt2(30cm to 91cm)	Silty clay
horizon 2BCt(91cm to 99cm)	Silty clay loam
horizon 2Cd(99cm to 152cm)	Silty clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: OzaB - Ozaukee silt loam, 2 to 6 percent slopes

Component: Ozaukee (93%)

The Ozaukee component makes up 93 percent of the map unit. Slopes are 2 to 6 percent. This component is on ground moraines on uplands. The parent material consists of loess over Wisconsinan age silty and clayey till. Depth to a root restrictive layer, densic material, is 24 to 45 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 27 inches during February, March, April. Organic matter content in the surface horizon is about 2 percent. This component is in the F110XY012IL Moist Glacial Drift Upland Forest ecological site. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 25 percent.

Component: Pewamo (3%)

Generated brief soil descriptions are created for major soil components. The Pewamo, drained soil is a minor component.

Component: Ashkum (3%)

Generated brief soil descriptions are created for major soil components. The Ashkum, drained soil is a minor component.

Soil Information

Component: Urban land (1%)

Generated brief soil descriptions are created for major soil components. The Urban land soil is a minor component.

Map Unit Ph (0.32%)

Map Unit Name: Pella silt loam, 0 to 2 percent slopes

Bedrock Depth - Min:

Watertable Depth - Annual Min: 0cm

Drainage Class - Dominant: Poorly drained

Hydrologic Group - Dominant: B/D - These soils have moderately low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Pella(85%)

horizon Ap(0cm to 28cm)

Silt loam

horizon Bg(28cm to 97cm)

Silty clay loam

horizon 2Cg(97cm to 200cm)

Stratified loamy sand to silty clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Ph - Pella silt loam, 0 to 2 percent slopes

Component: Pella (85%)

The Pella component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on drainageways on uplands. The parent material consists of silty glaciofluvial deposits over calcareous lacustrine deposits and/or calcareous loamy till. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is moderate. This soil is not flooded. It is frequently ponded. A seasonal zone of water saturation is at 0 inches during January, February, March, April, May, November, December. Organic matter content in the surface horizon is about 6 percent. Nonirrigated land capability classification is 2w. This soil meets hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 25 percent. There are no saline horizons within 30 inches of the soil surface.

Component: Kendall (7%)

Generated brief soil descriptions are created for major soil components. The Kendall soil is a minor component.

Component: Lamartine (6%)

Generated brief soil descriptions are created for major soil components. The Lamartine soil is a minor component.

Component: Palms (2%)

Generated brief soil descriptions are created for major soil components. The Palms, muck soil is a minor component.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *MILWAUKEE* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L

Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L

Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *MILWAUKEE* County

No Measures/Homes:	124
Geometric Mean:	2.1
Arithmetic Mean:	3.1
Median:	2.4
Standard Deviation:	2.6
Maximum:	15.3
% >4 pCi/L:	27
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the State/EPA Residential Radon Survey of Wisconsin conducted during 1986-87. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Federal Sources

FEMA National Flood Hazard Layer

FEMA FLOOD

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data

INDOOR RADON

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data

PWSV

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level

RADON ZONE

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS)

SDWIS

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database

SSURGO

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

USGS Current Topo

US TOPO

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology

US GEOLOGY

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System

FED USGS

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

Wells from NWIS

FED USGS

The U.S. Geological Survey's National Water Information System (NWIS) is the nation's principal repository of water resources data. The NWIS includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIW dataset contains select Site Types from the overall NWIS Sites data, limited to the following Group Site Types only: Groundwater Group Site Types: Well, Collector or Ranney type well, Hyporheic-zone well, Interconnected Wells, Multiple wells; Spring Group Site Type: Spring; and Other Group Site Types: Aggregate groundwater use, Cistern.

State Sources

Historic Well Construction Reports (1930-1989)

A list of Historic Well Construction Reports, made available by the Wisconsin Geological and Natural History Survey (WGNHS). The data includes private wells drilled for drinking water use from 1936 to 1989 and was compiled from well construction reports (WCRs) that were submitted by well drillers to the Wisconsin Department of Natural Resources (DNR). Since 1936, well drillers are required by the Wisconsin Department of Natural Resources (DNR) to file a well construction report for the construction of any well used for drinking water.

WATER WELLS

Oil and Gas Wells

As of WI state regulatory agencies, FracTracker Alliance - state of South Wisconsin confirmed not to have any active (drilled but not plugged) oil and gas wells.

OGW

Public Water Supply Systems

The Department of Natural Resources, Bureau of Drinking Water and Groundwater maintains data about Wisconsin's drinking water and groundwater quality. The Bureau's Drinking Water System is to enforce the Safe Drinking Water Act (SDWA) regulations covering Public Water Systems (PWS).

PWS

Well Construction Report

This is the list of Private Water Well data, maintained by Wisconsin Department of Natural Resources (DNR). The Data contains the private wells drilled for drinking water use, during 1988 to present.

PRIVATE WW

Well Inventory

Groundwater Retrieval Network (GRN) database contains the list of well data, maintained by Wisconsin Department of Natural Resources. The Data covers the period from the early 1970s to present for the Public Water Supply data; 1988 to present for the Private Water Supply data; from the mid 1970s to present for the GEMS database; and from the mid 1970s to present for the SWAMP system.

WELL

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

The background of the page is a topographic map with red contour lines on a dark red background. A dashed red line runs vertically through the center of the page. There is a small red 'x' mark on the dashed line in the upper-middle section and a solid red dot on the dashed line in the lower-middle section.

Description of Events: AIRCRAFT N207ME ARRIVED FROM MCI APPROXIMATELY 1145 CDT AND PARKED AT GATE 34 IN MKE. THE RAMP AGENTS OPEN THE AFT CARGO BIN DOORS AND ENCOUNTERED A STRONG SMELL OF GASOLINE. MAINTENANCE WAS CONTACTED AND THE BIN WAS CAREFULLY UNLOADED TO FIND A CARDBOARD BOX SATURATED ON ONE SIDE WITH GASOLINE. GASOLINE WAS FOUND ON THE FLOOR OF THE CARGO BIN. THE BOX WAS A BEING SHIPPED AS PRIORITY MAIL THROUGH THE U.S. POSTAL SERVICE AND WAS ADDRESSED: FROM: JASON BROWN 10470 ST. RT. 17 WEST PLAINS, MO 65775 TO: RICK JACOBSON 4281 N. GALAXY DR. JANESVILLE, WI THE BOX WAS A USED BOX WITH MARKINGS FROM KOHLER PLUMBING ON THE OUTSIDE, TAPED UP WITH POSTAL TAPE AND ADDRESSED WITH GENERAL USE LABELS. NO MARKINGS ON THE BOX INDICATED THAT THE CONTENTS WERE HAZARDOUS MATERIAL, OR SOMETHING OTHER THAN PLUMBING ITEMS. THE SENDER OF THE BOX INDICATED THAT IT CONTAINED A CHAINSAW AND THAT THE GASOLINE HAD NOT ALL BEEN DRAINED. THE BOX WAS RECEIVED OVER THE COUNTER BY AN ACCEPTING CLERK AT THE KANSAS CITY POST OFFICE WHO APPARENTLY HAD NOT ASKED SPECIFIC QUESTIONS CONCERNING THE CONTENTS OF THE PACKAGE. REGULAR PROCEDURES FOR A POSTAL FACILITY INCLUDE THE SCREENING OF QUESTIONABLE PACKAGE, HOWEVER, SINCE THIS PACKAGE HAD NO HAZMAT LABEL, THIS WAS APPARENTLY NOT DONE. THE PACKAGE WAS FORWARDED TO A STAGING AREA AT THE KANSAS CITY AIRPORT WHERE AGENTS FROM MIDWEST EXPRESS PICK UP MAIL DESIGNATED FOR OUR FLIGHTS AND SEPARATE THE MAIL BY DESTINATION. THE MAIL IS PLACED ON CARTS AND TAKEN TO THE AIRCRAFT. AGENTS WORKING FLIGHT 3, AIRCRAFT N207ME, DID NOT NOTICE ANYTHING UNUSUAL ABOUT THE PACKAGE, NOR DID THEY NOTICE ANY UNUSUAL SMELL DURING THE TRANSFER AND LOADING PROCESS. THE LEAKING COULD HAVE OCCURRED AS A RESULT OF THE BOX BEING LOADED UPSIDE DOWN, OR A RESULT OF THE CHANGE IN PRESSURE. A POSTAL AGENT RETRIEVED THE BOX AND NOTIFIED POSTAL OFFICIALS OF THE INCIDENT FOR FOLLOW-UP. AIRCRAFT N270ME WAS REMOVED FROM SERVICE FOR CLEAN UP OF APPROX. 1-2 PINTS OF GASOLINE. FLOORBOARDS WERE REMOVED TO ENSURE THAT THE GASOLINE HAD NOT GOTTEN INTO THE INSULATION. NO RESIDUAL FUEL WAS FOUND. FLOOR TAPE HAD BEEN SATURATED AND WAS REPLACED. WORK ORDER 30733 WAS USED TO TRACK THE MATERIALS AND LABOR FOR THE CLEANUP. THE WORK ORDER SHOWS A TOTAL OF 10.5 MAN-HOURS = \$179.77

WHEN THE SHIPMENT WAS TENDERED THE SHIPPER WAS ASKED IF IT CONTAINED GASOLINE HE SAID IT DID NOT. DURING LOADING IT WAS TIPPED AND ONE TO TWO OUNCES OF GASOLINE SPILLED ON THE BAGGAGE COMPARTMENT FLOOR. THE BOX WAS IMMEDIATELY REMOVED FROM THE AIRCRAFT AND THE SPILL WAS SOAKED UP WITH RAGS. THE DANGEROUS GOODS HOTLINE DOT AND OPBOP WERE NOTIFIED. NO INJURY PROPERTY OR AIRCRAFT DAMAGE OCCURRED. FOLLOWING CLEAN-UP THE AIRCRAFT DEPARTED FOR CHICAGO ON TIME. THE BOX CONTAINED A WOOD CHIPPER A NEW ONE-OF-A-KIND PROTOTYPE UNIT BEING SHIPPED FOR MARKETING AND PROMOTIONAL PURPOSES RATHER THAN USE ACCORDING TO THE SHUPPER.

Description of Events:						

ON FEBRUARY 26, 1991 FLIGHT 305 ARRIVES IN MILWAUKEE. AS THE BIN WAS BEING UNLOADED, A LIQUID SUBSTANCE WAS DENTECTED ON THE FLOOR OF THE BIN. FURTHER INVESTIGATION REEALED THAT A BOTTLE OF DURSBAN ANT KILLER FROM A PASSENGER'S CHECKED BAGGAGE HAD BROKEN AND THE CONTENTS HAD LEAKED. MIDWEST EXPRESS MAINTENANCE CONTROL PERSONNEL WERE CALLED TO CLEAN-UP THE SPILL. THE SPILL CAUSED NO DAMAGE, AND THE AIRCRAFT WAS RETURNED TO SERVICE.

Description of Events:						

ON AUGUST 16 1997 AMERICAN WEST AIRLINES (AWXA) FLT. #1158 ARRIVED AT MILWAUKEE WISCONSIN AIRPORT (MKE) AT APPROXIMATELY 1545 HOURS FROM PHOENIX ARIZONA (PHX). DURING THE COURSE OF UNLOADING THE BAGGAGE TWO (2) APPROVED CONTAINERS HOLDING ONE (1) EACH BATTERY WET FILLED WITH ACID ELECTRIC STORAGE WERE DISCOVERED IN THE AFT BIN OF THE B-737-300. INSPECTION REVEALED THAT BOTH BOXES WERE PROPERLY MARKED AND THE BATTERIES WERE PACKAGED IN AN APPROVED POLYETHYLENE BAG CONTAINING TWO (2) SUPER SORB PADS FOR EACH BATTERY ALL OF WHICH WAS CONTAINED WITHIN A CORRUGATED CARDBOARD BOX WHICH HAD BEEN APPROVED FOR USE BY CONTINENTAL AIRLINES (CALA) Y THE FAA. HOWEVER CLOSE EXAMINATION OF ONE (1) OF THE BOXES WHICH HAD BEEN FOUND IN AN UNSECURED CONDITION TITLED AGAINST THE SIDES OF THE BIN DISCLOSED THAT THE ACID FROM TWO (2) OF THE SIX (6) CELLS HAD APPARENTLY LEAKED THROUGH THE POLYETHYLENE BAGS INTO AND THROUGH THE OUTSIDE (BOX) CONTAINER AND FROM THERE TO THE DECK OF THE AIRCRAFT. AWXA OPERATIONS AND MAINTENANCE WERE CONTACTED. NO REPORT WAS MADE TO (#2052)(DEPARTING 2 HOURS AND 39 MINUTES LATE.) FACTORS CONTRIBUTING TO THE SPILL INCLUDED FAILURE TO USE THE COMPANY APPROVED NON SPILLABLE VENT CAPS AND TO SECURE THE BOXES CONTAINING THE BATTERIES IN THE AIRCRAFT AS MANDATED IN THE AWXA CUSTOMER SERVICE MANUAL. NO INJURIES LOSS OF LIFE NOR DAMAGE TO THE AIRCRAFT WAS SUSTAINED. CORRECTIVE ACTION TAKEN INCLUDED PERSONAL AND VOICE MAIL BRIEFING OF ALL CONCERNED PERSONNEL INITIATING A CAMPAIGN TO USE ONLY THE APPROVED REPLACEMENT PLASTIC BOXES FOR THE SHIPMENT OF WET BATTERIES AND IMPLEMENTING PROCEDURES TO INSURE THE TIMELY NOTIFICATION OF ALL CONCERNED REGULATORY AGENCIES.

Description of Events:	<p>Passenger Browne tendered a gas generator in its original packaging. The passenger declared that a generator was being transported, but did not advice the airline that it had been used. The passenger drained the generator, but residual gasoline was left in the fuel tank. MKE station agent Armstrong tagged the box and directed the passenger to drop the box at the TSA screening point. TSA received the package and as they put it on the CTX belt, the package was tilted and fuel leaked. The side of the box had a stain and there was a strong smell of gasoline coming from the package. TSA turned the box to AE lead agent Ocon. Mr. Ocon recorded all the passenger information, and advised that the item could not fly and that it had to be confiscated. The passenger said arrangements could be made to have a family member take the package home. Mr. Ocon donated the item back to the passenger. The spill was contained inside the box. The only proof of the leak were the gasoline smell and the stain on the box.</p>					
Recommend Actions Taken:	<p>All MKE agents have been made aware of this incident to ensure that they screen packages more closely before they accept them. A Memo has been posted noting the importance of making sure that items being transported comply with transportation requirements.</p>

Description of Events:	On 1-23-2014 the TSA was screening the passengers checked baggage and discovered a 32 ounce bottle of hydrogen peroxide, 35% that had leaked. The bottle was contained inside a cooler bag, which was inside the passengers checked bag. The leaked liquid was contained inside the cooler bag and none was released into the passengers bag.

DNR NOTIF Immediate Flag:
DNR Investigator: CHIEF DOYNE (MIL)
Spill Comment:

Cause Desc: DEFOREST POST SP RECEIVED A CALL ON THE SPILL HOTLINE THAT DUE TO COLD WEATHER, PIPES FROZE IN A HANGER. THIS CAUSED AN ACTIVATION OF THE FIRE SUPPRESSION SYSTEM, RELEASING APPROXIMATELY 100 GALLONS OF AFFF (A TRIPLE F) FOAM. THIS FOAM REACHED THE STORM DRAIN. 1/27/19 @ 0615: NEUMANN SPOKE WITH FIRE CHIEF DOYNE, WHO INDICATED THAT THE FOAM WAS A C6 FOAM AND NOT TRADITIONAL PFOS FOAM. THE FOAM WAS RELEASED INSIDE THE HANGAR AND IMPACTED THE SANITARY SEWER ONLY. ENVIRONMENTAL AT THE AIRPORT NOTIFIED MMSD AND PROVIDED AN SDS TO MMSD. CHIEF DOYNE INDICATED THAT HE DID NOT BELIEVE IT TO BE A DRINKING WATER RISK AND INDICATED THAT NO DNR ASSISTANCE WAS NEEDED. REPAIRS ARE BEING MADE TO THE FIRE SUPPRESSION SYSTEM WITHIN THE HANGAR. NEUMANN TO FOLLOW UP.

1/28/19 @ 1000: NEUMANN CALLED FIRE CHIEF DOYNE REQUESTING AN UPDATE. CHIEF DOYNE INDICATED THAT HE WOULD UPDATE NEUMANN ON REPAIRS TO FIRE SUPPRESSION SYSTEM AND PROVIDE AN SDS ON THE C6 FOAM, POSSIBLY ON 1/29/19. NEUMANN SENT EMAIL TO CHIEF DOYNE SO HE WOULD HAVE NEUMANN'S CONTACT INFORMATION.

2/4/19: NEUMANN SENT EMAIL REQUESTING STATUS OF REPAIRS AND SDS OF FIRE SUPPRESSION FOAM. NEUMANN REC'D SDS. PRODUCT WAS ANSULITE AFC-3MS 3% AFFF CONCENTRATE. ACCORDING TO THE SDS:

"THE ENVIRONMENTALLY-MINDFUL ANSULITE AFC-3MS CONCENTRATE FORMULATION CONTAINS SHORT-CHAIN, C-6 FLUORO-CHEMICALS MANUFACTURED USING A TELOMER-BASED PROCESS. THE TELOMER PROCESS PRODUCES NO PFOS, AND THESE C-6 MATERIALS DO NOT BREAKDOWN TO YIELD PFOA. THE FLUORO-CHEMICALS USED IN THE CONCENTRATE MEET THE GOALS OF THE U.S. ENVIRONMENTAL PROTECTION AGENCY 2010/15 PFOA STEWARDSHIP PROGRAM."

2/6/19: NEUMANN SPOKE WITH AIRPORT ENVIRONMENTAL MANAGER GREG FAILEY. GREG INDICATED THAT IT WAS FOAM THAT WAS

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

RELEASED, WITH A SMALL AMOUNT OF LIQUID PRODUCT. THE TOTAL AMOUNT RELEASED WAS ~100 (MAKING FOR ~3 GALLONS OF AFFF). THE RELEASE WAS CONTAINED TO THE HANGAR AND DISCHARGED TO MMSD. DAVE NESTE (DNR SPILL COORDINATOR) INDICATED THAT THERE IS CURRENTLY

Resource Damage Flag: N
Resource Damage Comment:
DNR NOTIF Immediate Flag:
DNR Investigator: FIRE CHIEF CHRIS
Spill Comment:

1/11/19: NEUMANN CALLED FIRE CHIEF MCGOWAN. MCGOWAN INDICATED THAT WHILE TRANSFERRING FUEL TO AN AIRCRAFT, APPROXIMATELY 5 GALLONS RELEASED ONTO THE CONCRETE AIRCRAFT APRON. AIRPORT FIRE DEPARTMENT CLEANED THE JET FUEL RELEASE WITH ABSORBENT PADS, AND THE PADS WERE DISPOSED OF.

MCGOWAN INDICATED NO IMPACTS TO WATERWAYS, SEWERS, OR GRASS, JUST TO CONCRETE AND CONTAINED/CLEANED UP. NO DNR ASSISTANCE WAS REQUESTED.

BASED ON THE AVAILABLE INFORMATION, IMPACTS REMOVED AND NO FURTHER ACTIONS ARE NECESSARY.

DNR Investigator:	GMIA & DNR
Spill Comment:	

2/22/22: PRIME FLIGHT REFUELING A UNITED PLANE - OPERATOR ERROR CAUSED A RELEASE. APPROXIMATELY 40 GALLONS WENT TO THE PAVED SURFACE. WITH THE RAIN, SOME WENT TO THE STORM SEWER. 55 SECONDS OF RELEASE. EMERGENCY RESPONSE - CLEANED UP FUEL ON THE PAVED SURFACE. DOUBLE BOOM IN THE STORM SEWER. APPROXIMATELY 5-10 GALLONS INTO THE STORM SEWER. THEY WENT DOWN STREAM TO MAKE OBSERVATIONS - NOTHING OBSERVED. ANY SHEEN IN THE CREEK WOULD BE UNRECOVERABLE DUE TO THE AMOUNT OF RAIN TODAY AND THE RATE OF FLOW, ACCORDING TO GREG FAILEY (GMIA).

CLEANED UP PAVED SURFACE TO THE EXTENT PRACTICABLE. GREG WILL SEND A FOLLOW UP EMAIL. THEY WILL KEEP THE BOOM IN THE STORM SEWER IN PLACE UNTIL THEY NO LONGER SEE ANY SHEEN IN THAT AREA.

NEUMANN REC'D 2ND EMAIL FROM GREG. NO FURTHER SHEEN OBSERVED AND BOOM WAS REMOVED.

2/24: NEUMANN MADE OBSERVATIONS OF DOWNGRADIENT, ACCESSIBLE AREAS OF THE CREEK. DEMINIMUS SHEEN WAS OBSERVED, POSSIBLY RELATED TO THIS RELEASE. WILL MAKE ADDITIONAL OBSERVATIONS.

3/3: NEUMANN MADE OBSERVATIONS OF DOWNGRADIENT LOCATION. THE ICE HAD MELTED AND DEMINUMUS SHEEN WAS OBSERVED. UNRECOVERABLE AMOUNT.

3/17: NEUMANN MADE OBSERVATIONS. NO EVIDENCE OF SHEEN WAS OBSERVED. BASED ON THE AVAILABLE INFORMATION, IMPACTS WERE ADDRESSED TO THE EXTENT PRACTICABLE AND NO FURTHER ACTIONS APPEAR NECESSARY AT THIS TIME.

ON FEBRUARY 7, 2007 LARRY FOX CALLED SHAUN NADOLNY AND REQUESTED A REPORT. ON 04/27/2007, FOX CALLED AND LEFT A MESSAGE FOR SHAUN. ON MAY 8, 2007, FOX TOLD NADOLNY TO RESPOND TO FOX'S MESSAGE OR A "NON" WOULD HAVE TO BE ISSUED. ON MAY 10, 2007, NOEL PACHECO (859)-767-1557 CALLED AND SAID HE WOULD SEND A REPORT. A LETTER WAS RECIEVED FROM COMAIR AND FOX DECIDED THAT THIS SPILL COULD BE CLOSED MAY 16, 2007.

Spill Comment:

1/11/19: NEUMANN CALLED FIRE CHIEF CHRIS MCGOWAN. MCGOWAN INDICATED THAT JET FUEL RELEASE WAS ONLY TO CONCRETE, NO WATERWAYS, SOIL, OR SEWERS WERE IMPACTED. AIRPORT FIRE DEPARTMENT RESPONDED BY APPLYING ABSORBENT PADS. THE ABSORBENT PADS WERE REMOVED AND DISPOSED OF. NO DNR ASSISTANCE WAS REQUESTED.

BASED ON THE AVAILABLE INFORMATION, IMPACTS REMOVED AND NO FURTHER ACTION IS NECESSARY.

Action Information

Action Date:	1986-08-10
Action Code:	1
Action Name:	Spill Incident Occurred
Action Desc:	Date a hazardous substance spill occurred or date reported to DNR (or DATCP) if actual date of spill is unknown.
Action Comment:	Auto populated via migration process
Action Date:	1986-08-10
Action Code:	5
Action Name:	Notification of Hazardous Substance Spill
Action Desc:	Date a hazardous substance spill is reported to DNR (or DATCP)
Action Comment:	
Action Date:	1986-08-10
Action Code:	777
Action Name:	Historic Spill
Action Desc:	This is a historic spill activity. Further review by DNR is required to confirm the activity status. Please contact DNR for file information.

Spill Comment:

Cause Desc: THE CAUSE OF THE SPILL IS UNKNOWN AT THIS TIME, THE INTERNATIONAL ARRIVAL BUILDING WAS HAVING ROOF WORK DONE LAST WEEK, IT IS BELIEVED THAT SOME SUBSTANCE FROM THAT IS WHAT THE SPILL WAS, THE SPILL DOES APPEAR TO HAVE REACHED A STORM DRAIN. 11/12/18 1230: NEUMANN CALLED GREG FAILEY (MKE AIRPORT). LEFT A VOICEMAIL REQUESTING UPDATE.

11/13/18: NEUMANN SPOKE WITH GREG FAILEY. GREG INDICATED THAT A ROOFING CONTRACTOR WAS PERFORMING ROOF REPAIRS. THE CONTRACTORS USED CHLORIDE SALT DURING ROOFING REPAIR ACTIVITIES. THE ROOF AREA WAS VAC'D TO REMOVE GRAVEL. VAC TRUCK REMOVED GRAVEL, ROOFING TAR, CHLORIDE SALT, AND WATER/ICE FROM THE ROOF. THIS MATERIAL WAS TRANSFERRED TO A DUMP TRUCK. DURING TRANSFER, A SPILL OCCURRED. MKE AIRPORT RESPONDED ON 11/12 BY VACCING THE SPILLED MATERIAL. GREG INDICATED THAT NO RESIDUAL MATERIAL WAS LEFT DURING SITE OBSERVATIONS MADE ON 11/13/18. UNRECOVERABLE AMOUNT POTENTIALLY ENTERED THE STORM SEWER. NO DNR ASSISTANCE WAS REQUESTED.

Spill Comment:

12/27/17 ~1430: NEUMANN LEFT A VOICEMAIL FOR GREG FAILEY (MKE AIRPORT ENVIRONMENTAL).

12/29/17: NEUMANN FORWARDED SPILL INFORMATION TO WASTEWATER STAFF (LENT, THIELEN, AND HARTSOOK).

1/2/18 0830: NEUMANN SPOKE WITH GREG FAILEY. FAILEY INFORMED NEUMANN THAT ~45 GALLONS OF GLYCOL WAS RELEASED. THE GLYCOL WAS USED AND BEING STORED IN A COLLECTION TANK. THE DRAIN CLOSE TO THE RELEASE IS CONNECTED TO A PERMITTED OUTFALL. THE PERMIT ALLOWS GLYCOL THAT IS 'UNAVAILABLE FOR CAPTURE' TO DISCHARGE. THE SUBSTANCE IS BIODEGRADABLE.

1/3/18: NEUMANN SPOKE WITH THIELEN (WASTEWATER STAFF) REGARDING POSSIBLE RECLAMATION/VACUUMING DISCHARGED GLYCOL.

1/4/18: NEUMANN REC'D EMAIL FROM GREG FAILEY, WITH PHOTOS. THE RELEASED GLYCOL WAS ENTRAINED WITHIN THE FRESH SNOW AND DID NOT FLOW INTO THE ADJACENT STORM SEWER. FAILEY INSPECTED THE STORM SEWER AND DID NOT SEE ANY RELEASED MATERIAL WITHIN THE SEWER. THE AIRCRAFT DEICING FLUID IS DYED ORANGE, SO COLORATION IS VISIBLE. THE IMPACTED SNOW WAS REMOVED FROM THE AREA AND DEPOSITED ON PERVIOUS GRASS INFIELD AREAS WHERE THEY NORMALLY PUT IMPACTED SNOW FOR NATURAL ATTENUATION/MELTING.

1/4/18: NEUMANN SPOKE WITH HARTSOOK. HARTSOOK INDICATED THAT WASTEWATER STAFF WOULD FOLLOW UP, AND THAT NO FURTHER CLEANUP ACTIVITIES ARE NECESSARY AT THIS TIME.

Spill Comment:

ACTING RSC LOWERY CALLED FIRE CHIEF WISNEWSKI ON 5/8/14. MAINTENANCE CREW RECOVERED ABOUT A PINT OF THE OIL WHERE THE VEHICLE STOPPED. THE REST WAS SPREAD OVER ABOUT 1 MILE ON CONCRETE SO IT COULD NOT BE RECOVERED. CAUSE OF SPILL WAS A HYDRAULIC LINE RUPTURE ON A LUGGAGE LOADING VEHICLE. RESPONSIBLE PARTY IS TUG (MAINTENANCE COMPANY). THIS IS CLEANED UP TO THE EXTENT PRACTICABLE.

Hazardous Waste Handler Details

Sequence No: 1
Receive Date: 20080508
Handler Name: GENERAL MITCHELL INT'NL -AIRTRAN AIRWAYS
Source Type: Notification
Federal Waste Generator Code: 3
Generator Code Description: Very Small Quantity Generator

Waste Code Details

Hazardous Waste Code: D035
Waste Code Description: METHYL ETHYL KETONE

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: F001
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Description of Events:					<p>ON AUGUST 16, 1997 AMERICAN WEST AIRLINES (AWXA) FLT. #1158 ARRIVED AT MILWAUKEE, WISCONSIN AIRPORT (MKE) AT APPROXIMATELY 1545 HOURS FROM PHOENIX, ARIZONA (PHX). DURING THE COURSE OF UNLOADING THE BAGGAGE, TWO (2) APPROVED CONTAINERS HOLDING ONE (1) EACH BATTERY, WET, FILLED WITH ACID, ELECTRIC, STORAGE WERE DISCOVERED IN THE AFT BIN OF THE B-737-300. INSPECTION REVEALED THAT BOTH BOXES WERE PROPERLY MARKED AND THE BATTERIES WERE PACKAGED IN AN APPROVED POLYETHYLENE BAG CONTAINING TWO (2) SUPER SORB PADS FOR EACH BATTERY, ALL OF WHICH WAS CONTAINED WITHIN A CORRUGATED CARDBOARD BOX WHICH HAD BEEN APPROVED FOR USE BY CONTINENTAL AIRLINES (CALA) Y THE FAA. HOWEVER, CLOSE EXAMINATION OF ONE (1) OF THE BOXES, WHICH HAD BEEN FOUND IN AN UNSECURED CONDITION, TITLED AGAINST THE SIDES OF THE BIN DISCLOSED THAT THE ACID FROM TWO (2) OF THE SIX (6) CELLS HAD APPARENTLY LEAKED THROUGH THE POLYETHYLENE BAGS INTO AND THROUGH THE OUTSIDE (BOX) CONTAINER AND FROM THERE TO THE DECK OF THE AIRCRAFT. AWXA OPERATIONS AND MAINTENANCE WERE CONTACTED. NO REPORT WAS MADE TO (#2052)(DEPARTING 2 HOURS AND 39 MINUTES LATE.) FACTORS CONTRIBUTING TO THE SPILL INCLUDED FAILURE TO USE THE COMPANY APPROVED NON SPILLABLE VENT CAPS AND TO SECURE THE BOXES CONTAINING THE BATTERIES IN THE AIRCRAFT AS MANDATED IN THE AWXA CUSTOMER SERVICE MANUAL. NO INJURIES, LOSS OF LIFE NOR DAMAGE TO THE AIRCRAFT WAS SUSTAINED. CORRECTIVE ACTION TAKEN INCLUDED PERSONAL AND VOICE MAIL BRIEFING OF ALL CONCERNED PERSONNEL, INITIATING A CAMPAIGN TO USE ONLY THE APPROVED REPLACEMENT PLASTIC BOXES FOR THE SHIPMENT OF WET BATTERIES AND IMPLEMENTING PROCEDURES TO INSURE THE TIMELY NOTIFICATION OF ALL CONCERNED REGULATORY AGENCIES.</p>

Description of Events:					<p>WHEN THE SHIPMENT WAS TENDERED THE SHIPPER WAS ASKED IF IT CONTAINED GASOLINE, HE SAID IT DID NOT. DURING LOADING IT WAS TIPPED AND ONE TO TWO OUNCES OF GASOLINE SPILLED ON THE BAGGAGE COMPARTMENT FLOOR. THE BOX WAS IMMEDIATELY REMOVED FROM THE AIRCRAFT AND THE SPILL WAS SOAKED UP WITH RAGS. THE DANGEROUS GOODS HOTLINE, DOT AND OPBOP WERE NOTIFIED. NO INJURY PROPERTY OR AIRCRAFT DAMAGE OCCURRED. FOLLOWING CLEAN-UP THE AIRCRAFT DEPARTED FOR CHICAGO ON TIME. THE BOX CONTAINED A WOOD CHIPPER, A NEW, ONE-OF-A-KIND PROTOTYPE UNIT, BEING SHIPPED FOR MARKETING AND PROMOTIONAL PURPOSES RATHER THAN USE, ACCORDING TO THE SHUPPER.</p>

Action Information

Action Date:	2010-07-02
Action Code:	84
Action Name:	Remaining Actions Needed
Action Desc:	Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.
Action Comment:	LETTER SENT - CLOSE WITH "11" ON RECEIPT OF WELL ABANDONMENT FORMS
Action Date:	2010-12-13
Action Code:	11
Action Name:	Activity Closed
Action Desc:	Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comment:	LETTER SENT
Action Date:	2010-12-13
Action Code:	56
Action Name:	Continuing Obligation(s) Applied
Action Desc:	Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.
Action Comment:	
Action Date:	2009-07-17
Action Code:	80
Action Name:	Closure Not Recommended
Action Desc:	Date DNR sends a letter in response to a request for closure review. Letter outlines the reasons DNR cannot recommend site closure at this time.
Action Comment:	LETTER SENT - NEED ADD'L INFORMATION
Action Date:	2009-02-23
Action Code:	710
Action Name:	Database Fee Paid for Soil Continuing Obligation(s)
Action Desc:	Date fee received for residual soil contamination and related continuing obligations.
Action Comment:	REC'D CK# 053120 \$200.00
Action Date:	2010-07-16
Action Code:	90
Action Name:	SER First In/First Out (FIFO) Review Process Started
Action Desc:	Date DNR southeast region (SER) review process of first in/first out (FIFO) is completed for a submittal.
Action Comment:	FINAL CASE CLOSURE & WELL ABANDONMENT
Action Date:	2010-01-19
Action Code:	90
Action Name:	SER First In/First Out (FIFO) Review Process Started
Action Desc:	Date DNR southeast region (SER) review process of first in/first out (FIFO) is completed for a submittal.
Action Comment:	REC'D ADD'L REQUESTED INF FOR SI REPT FOR CLOSURE
Action Date:	2010-04-06
Action Code:	91
Action Name:	SER First In/First Out (FIFO) Review Process Complete
Action Desc:	Date DNR southeast region (SER) review process of first in/first out (FIFO) is started for a submittal.

Action Comment:			CALLED CONSULTANT TO SEND MISSING PAGES OF THE LEASE AGREEMENT (DEED OF PROPERTY)			
Action Date:			2010-12-13			
Action Code:			224			
Action Name:			Continuing Obligation - Structural Impediment to Cleanup			
Action Desc:			Closure or ongoing cleanup was approved with the requirement to conduct further investigation and cleanup as necessary following the removal of a structural impediment that impeded the original investigation.			
Action Comment:						
Action Date:			2010-07-02			
Action Code:			91			
Action Name:			SER First In/First Out (FIFO) Review Process Complete			
Action Desc:			Date DNR southeast region (SER) review process of first in/first out (FIFO) is started for a submittal.			
Action Comment:			REVIEW COMPLETED			
Action Date:			2008-08-01			
Action Code:			1			
Action Name:			Notification of Hazardous Substance Discharge			
Action Desc:			Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.			
Action Comment:						
Action Date:			2008-09-05			
Action Code:			2			
Action Name:			Responsible Party (RP) letter sent			
Action Desc:			Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.			
Action Comment:						
Action Date:			2010-04-08			
Action Code:			90			
Action Name:			SER First In/First Out (FIFO) Review Process Started			
Action Desc:			Date DNR southeast region (SER) review process of first in/first out (FIFO) is completed for a submittal.			
Action Comment:			RECV'D ADDITIONAL INFORMATION FOR CLOSURE			
Action Date:			2010-12-13			
Action Code:			48			
Action Name:			Preventive Action Limit (PAL) NR140 Exemption at Closure			
Action Desc:			DNR has approved site closure with an exemption under NR 140 allowing site closure with groundwater contamination above the preventive action limit (PAL).			
Action Comment:			NAPHTHALENE AT B1 (A)-W			
Action Date:			2010-12-13			
Action Code:			222			
Action Name:			Continuing Obligation - Maintain Cap Over Contaminated Area			
Action Desc:			Closure or ongoing cleanup was approved with the requirement to maintain a cap or cover to protect against exposure to contaminated soil (direct contact) or to reduce the movement of residual contamination in soil or groundwater.			
Action Comment:						
Action Date:			2010-12-13			
Action Code:			232			
Action Name:			Continuing Obligation - Residual Soil Contamination			
Action Desc:			Closure or ongoing cleanup was approved with the Continuing Obligation to address residual soil contamination at or above the Residual Contamination Level (RCL) or Site Specific Residual Contaminant Level (SSRCL) per rules, when moved.			
Action Comment:			*** AUTO POPULATED AT FINAL CLOSURE DUE TO 710 ACTION ***			
Action Date:			2009-02-23			
Action Code:			79			
Action Name:			Case Closure Review Request Received			
Action Desc:			Date DNR Project Manager received a request to review Case Closure - (Form 4400-202). A fee was paid for DNR review.			
Action Comment:			REC'D CK# 053120 \$750.00

Violation/Evaluation Summary

Note: VIOLATION or UNDETERMINED: There are VIOLATION or UNDETERMINED details or records associated with this facility (EPA ID) in the Compliance Monitoring and Enforcement table dated Jul, 2023.

Violation Details

Found Violation: Yes
Citation:
Violation Short Description: Generators - General
Violation Type: 262.A
Violation Determined Date: 20020904
Scheduled Compliance Date: 20030726
Return to Compliance: Documented
Actual Return to Compl: 20030730
Violation Responsible Agency: State

Enforcement Details

Enforcement Type: 124
Enforcement Type Description: NOTICE OF NONCOMPLIANCE LETTER
Enforcement Action Date: 20030626
Enf Disposition Status:
Disposition Status Date:
Enforcement Lead Agency: State
Proposed Penalty Amount:
Final Amount:
Paid Amount:

Evaluation Details

Evaluation Start Date: 20020904
Evaluation Type Description: COMPLIANCE EVALUATION INSPECTION ON-SITE
Violation Short Description: Generators - General

Waste Code Description: SILVER

Hazardous Waste Code: D035
Waste Code Description: METHYL ETHYL KETONE

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: U117
Waste Code Description: ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Action Desc:				Miscellaneous action - See Action Comments		
Action Comment:				SITE INSPECTION REPORT RESPONSE LETTER		
Action Date:				2021-02-03		
Action Code:				195		
Action Name:				Semi-Annual/PECFA Cost Reporting (NR700) Requirement Met		
Action Desc:				Date DNR received submittal of completed online semi-annual report form, meeting the requirements of NR 700.		
Action Comment:				Period: 7/1/2020 - 12/31/2020		
Action Date:				2022-06-30		
Action Code:				854		
Action Name:				Materials Management Plan Request Recvd with Fee		
Action Desc:				Date DNR received a request to approve a management plan for the movement of soil under NR718 and a review fee has been paid. Submittal must include all documents to be complete (soil management plan, letter of acknowledgement, maintenance plan, etc.).		
Action Comment:				REC'D ACH PAYMENT, MMP		
Action Date:				2018-11-28		
Action Code:				1		
Action Name:				Notification of Hazardous Substance Discharge		
Action Desc:				Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.		
Action Comment:						
Action Date:				2020-01-08		
Action Code:				195		
Action Name:				Semi-Annual/PECFA Cost Reporting (NR700) Requirement Met		
Action Desc:				Date DNR received submittal of completed online semi-annual report form, meeting the requirements of NR 700.		
Action Comment:				Period: 7/1/2019 - 12/31/2019		
Action Date:				2019-03-21		
Action Code:				37		
Action Name:				Site Investigation Report (SIR) Received (non-fee)		
Action Desc:				Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.

Action Information

Action Date:	1999-05-28
Action Code:	1

<i>Map Key</i>	<i>Number of Records</i>	<i>Direction</i>	<i>Distance (mi/ft)</i>	<i>Elev/Diff (ft)</i>	<i>Site</i>	<i>DB</i>
Action Name:					Notification of Hazardous Substance Discharge	
Action Desc:					Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.	
Action Comment:						
Action Date:					2000-09-06	
Action Code:					43	
Action Name:					Site Activity Status Update Received	
Action Desc:					Date DNR received an update regarding site activities.	
Action Comment:						
Action Date:					2001-04-03	
Action Code:					99	
Action Name:					Miscellaneous	
Action Desc:					Miscellaneous action - See Action Comments	
Action Comment:					RECEIVED WELL ABANDONMENT FORMS.	
Action Date:					2001-02-05	
Action Code:					48	
Action Name:					Preventive Action Limit (PAL) NR140 Exemption at Closure	
Action Desc:					DNR has approved site closure with an exemption under NR 140 allowing site closure with groundwater contamination above the preventive action limit (PAL).	
Action Comment:					PAL EXEMPTION	
Action Date:					1999-12-14	
Action Code:					43	
Action Name:					Site Activity Status Update Received	
Action Desc:					Date DNR received an update regarding site activities.	
Action Comment:						
Action Date:					2001-02-05	
Action Code:					84	
Action Name:					Remaining Actions Needed	
Action Desc:					Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.	
Action Comment:					PAL EXEMPTION, WELL ABANDONMENT FORMS BEFORE CLOSURE	
Action Date:					2000-06-12	
Action Code:					43	
Action Name:					Site Activity Status Update Received	
Action Desc:					Date DNR received an update regarding site activities.	
Action Comment:					GW MONITORING	
Action Date:					2000-11-16	
Action Code:					79	
Action Name:					Case Closure Review Request Received	
Action Desc:					Date DNR Project Manager received a request to review Case Closure - (Form 4400-202). A fee was paid for DNR review.	
Action Comment:					BG REC'D CHECK #1070 FOR \$750	
Action Date:					2000-09-06	
Action Code:					179	
Action Name:					Case Closure Review Request Received (non-fee)	
Action Desc:					Date DNR received a case Closure Review Request for a site where the fee has previously been paid or no fee is required (i.e. Voluntary Party Liability Exemption).	
Action Comment:					CLOSURE REPORT/FINAL GROUNDWATER MONITORING	
Action Date:					2001-04-03	
Action Code:					11	
Action Name:					Activity Closed	
Action Desc:					Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.	
Action Comment:					SITE CLOSED	
Action Date:					1999-07-12	
Action Code:					2	
Action Name:					Responsible Party (RP) letter sent	
Action Desc:					Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the

Action Information

Action Date: 1995-12-06
Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.

Action Comment:

Action Date: 1997-12-22
Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.

Action Comment:

Action Date: 1996-11-21
Action Code: 41
Action Name: Remedial Action Report Received
Action Desc: [OBSOLETE] Date the DNR receives the Remedial Action Report detailing remedial action efforts for an activity.

Action Information

Action Date: 2006-08-08
 Action Code: 56
 Action Name: Continuing Obligation(s) Applied
 Action Desc: Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.
 Action Comment: BB.

Action Date: 2003-02-10
 Action Code: 52
 Action Name: Deed Restriction for Residual Soil Contamination Recorded
 Action Desc: Deed Restriction was recorded at the Register of Deeds, due to residual soil contamination, to ensure that land use does not pose a health threat. If the soils are made accessible, additional action is required.

Action Information

Action Date:	2013-07-02
Action Code:	89
Action Name:	DSPS (formerly Commerce) Transferred Back to DNR
Action Desc:	Date the WI Dept of Safety and Professional Services (DSPS) transfers oversight of activity back to the DNR.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
<hr/>						
Action Comment:					DSPS was part of the Dept of Commerce until 2011. PECFA PROGRAM TRANSFER 2013-2015 STATE BUDGET	
Action Date:					1997-12-16	
Action Code:					2	
Action Name:					Responsible Party (RP) letter sent	
Action Desc:					Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.	
Action Comment:						
Action Date:					2000-07-31	
Action Code:					76	
Action Name:					Activity Transferred to DSPS (formerly Commerce)	
Action Desc:					Oversight of medium or low risk petroleum cleanup has been transferred to the WI Dept of Safety and Professional Services (DSPS). DSPS was part of the Dept of Commerce until 2011.	
Action Comment:					transferred 5/26/00 with 241817180(03-41-178125) new fid, brrts # set up to reflect correct address	
Action Date:					1997-11-10	
Action Code:					1	
Action Name:					Notification of Hazardous Substance Discharge	
Action Desc:					Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.	
Action Comment:						
Action Date:					2004-07-21	
Action Code:					11	
Action Name:					Activity Closed	
Action Desc:					Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.	
Action Comment:					*** NR726 Closure from Commerce Data Interchange ***	
Action Date:					2000-12-01	
Action Code:					84	
Action Name:					Remaining Actions Needed	
Action Desc:					Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.	
Action Comment:					*** Conditional Closure from Commerce Data Interchange ***	
Action Date:					2000-09-22	
Action Code:					37	
Action Name:					Site Investigation Report (SIR) Received (non-fee)	
Action Desc:					Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.	
Action Comment:					*** SITE INVESTIGATION DETERMINED BY DSPS TO BE COMPLETE - FROM DSPS DATA INTERCHANGE ***

Handler Summary

Importer Activity: No
Mixed Waste Generator: No
Transporter Activity: No
Transfer Facility: No
Onsite Burner Exemption: No
Furnace Exemption: No
Underground Injection Activity: No
Commercial TSD: No
Used Oil Transporter: No
Used Oil Transfer Facility: No
Used Oil Processor: No
Used Oil Refiner: No
Used Oil Burner: No
Used Oil Market Burner: No
Used Oil Spec Marketer: No

Hazardous Waste Handler Details

Sequence No: 2
Receive Date: 20041115
Handler Name: FAA - MITCHELL FIELD AIR TRAFFIC CONTROL
Source Type: Notification
Federal Waste Generator Code: N
Generator Code Description: Not a Generator, Verified

Waste Code Details

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D008
Waste Code Description: LEAD

Hazardous Waste Handler Details

Sequence No: 1
Receive Date: 19940216
Handler Name: MITCHELL FIELD MKE ATCT
Source Type: Notification
Federal Waste Generator Code: 3
Generator Code Description: Very Small Quantity Generator

Waste Code Details

Action Information

Action Date: 2009-09-16
Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comment: *** NR746 Closure from Commerce Data Interchange ***

Action Date: 1996-06-10
Action Code: 76
Action Name: Activity Transferred to DSPS (formerly Commerce)
Action Desc: Oversight of medium or low risk petroleum cleanup has been transferred to the WI Dept of Safety and Professional Services (DSPS). DSPS was part of the Dept of Commerce until 2011.
Action Comment:

Action Date: 1998-02-10
Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.
Action Comment: *** SITE INVESTIGATION DETERMINED BY DSPS TO BE COMPLETE - FROM DSPS DATA INTERCHANGE ***

Action Date: 2013-07-02
Action Code: 89
Action Name: DSPS (formerly Commerce) Transferred Back to DNR
Action Desc: Date the WI Dept of Safety and Professional Services (DSPS) transfers oversight of activity back to the DNR. DSPS was part of the Dept of Commerce until 2011.
Action Comment: PECFA PROGRAM TRANSFER 2013-2015 STATE BUDGET

Action Date: 1994-02-15
Action Code: 2
Action Name: Responsible Party (RP) letter sent
Action Desc: Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.
Action Comment: RP LETTER

Action Date: 1993-11-22
Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.

Action Date:			1992-01-09			
Action Code:			99			
Action Name:			Miscellaneous			
Action Desc:			Miscellaneous action - See Action Comments			
Action Comment:			VERBAL APPROVAL OF PHASE I ADDENDUM			
Action Date:			1990-05-03			
Action Code:			1			
Action Name:			Notification of Hazardous Substance Discharge			
Action Desc:			Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.			
Action Comment:						
Action Date:			2013-07-02			
Action Code:			89			
Action Name:			DSPS (formerly Commerce) Transferred Back to DNR			
Action Desc:			Date the WI Dept of Safety and Professional Services (DSPS) transfers oversight of activity back to the DNR. DSPS was part of the Dept of Commerce until 2011.			
Action Comment:			PECFA PROGRAM TRANSFER 2013-2015 STATE BUDGET			
Action Date:			2002-03-29			
Action Code:			232			
Action Name:			Continuing Obligation - Residual Soil Contamination			
Action Desc:			Closure or ongoing cleanup was approved with the Continuing Obligation to address residual soil contamination at or above the Residual Contamination Level (RCL) or Site Specific Residual Contaminant Level (SSRCL) per rules, when moved.			
Action Comment:						
Action Date:			2002-08-21			
Action Code:			50			
Action Name:			Groundwater Use Restriction Potentially Filed			
Action Desc:			Historical action that may represent a Groundwater Use Restriction filing was recorded or that site conditions would merit a deed filing at closure. Groundwater (and/or soil) continuing obligations may have later been applied through the Closure Letter. Documentation should be reviewed to confirm.			
Action Comment:			AB			
Action Date:			2002-03-29			
Action Code:			46			
Action Name:			Impacted Right-of-Way (ROW) Notification			
Action Desc:			Contamination has impacted one or more rights-of-way (ROW). The affected right-of-way (ROW) holders have been notified by the DNR.			
Action Comment:			AUTO-POPULATED 2018-03-20			
Action Date:			1996-09-17			
Action Code:			43			
Action Name:			Site Activity Status Update Received

Action Information

Action Date:	1993-03-04
Action Code:	2
Action Name:	Responsible Party (RP) letter sent
Action Desc:	Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.

Action Comment:

Action Date: 1993-03-02
Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.

Action Comment:

Action Date: 1997-08-25
Action Code: 99
Action Name: Miscellaneous
Action Desc: Miscellaneous action - See Action Comments
Action Comment: SUMP ABAND

Action Date: 1993-06-01
Action Code: 33
Action Name: Tank System Site Assessment (TSSA) Report Received
Action Desc: Date DNR received a tank system site assessment (TSSA) regarding tank closure or change in services for an above-ground or underground tank system.

Action Comment:

Action Date: 1993-03-02
Action Code: 70
Action Name: Emergency Response Start
Action Desc: Date when the threat of fire or explosion is discovered, or drinking water supplies are threatened or contaminated.

Action Comment:

Action Date: 1995-09-13
Action Code: 41
Action Name: Remedial Action Report Received
Action Desc: [OBSOLETE] Date the DNR receives the Remedial Action Report detailing remedial action efforts for an activity.
Action Comment: RA REPORT RECVD

Action Date: 1996-09-26
Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.

Action Comment:

Action Date: 1994-02-16
Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.

Action Information

Action Date: 2000-09-27
Action Code: 76
Action Name: Activity Transferred to DSPTS (formerly Commerce)
Action Desc: Oversight of medium or low risk petroleum cleanup has been transferred to the WI Dept of Safety and Professional Services (DSPTS). DSPTS was part of the Dept of Commerce until 2011.

Action Comment:

Action Date: 2000-06-28
Action Code: 2
Action Name: Responsible Party (RP) letter sent
Action Desc: Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.

Action Comment:

Action Date: 2000-06-20
Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.

Action Comment:

Action Date: 2013-07-02
Action Code: 89
Action Name: DSPTS (formerly Commerce) Transferred Back to DNR
Action Desc: Date the WI Dept of Safety and Professional Services (DSPTS) transfers oversight of activity back to the DNR. DSPTS was part of the Dept of Commerce until 2011.

Action Comment:

PECFA PROGRAM TRANSFER 2013-2015 STATE BUDGET

Action Date: 2000-12-04
Action Code: 84
Action Name: Remaining Actions Needed
Action Desc: Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.

Action Comment:

*** Conditional Closure from Commerce Data Interchange ***

Action Date: 2000-09-14
Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.

Action Comment:

*** SITE INVESTIGATION DETERMINED BY DSPTS TO BE COMPLETE - FROM DSPTS DATA INTERCHANGE ***

Action Date: 2000-09-14
Action Code: 182
Action Name: Case Closure Review Request Received - Fee Required
Action Desc: Date the case closure review request was received; however, no fee has been submitted. DNR will not review the request for closure until the fee has been paid.

Action Comment:

Action Date: 2008-11-25
Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.

Action Comment:

*** NR726 Closure from Commerce Data Interchange ***

Action Information

Action Date: 2012-07-06
Action Code: 84
Action Name: Remaining Actions Needed
Action Desc: Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.
Action Comment: *** Conditional Closure from DSPS Data Interchange ***

Action Date: 2006-08-02
Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.
Action Comment:

Action Date: 2012-08-07
Action Code: 56
Action Name: Continuing Obligation(s) Applied
Action Desc: Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.
Action Comment: AUTO-POPULATED AS REPLACEMENT FOR CODE 50

Action Date: 2012-08-07
Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comment: *** NR726 Closure from DSPS Data Interchange ***

Action Date: 2012-08-07
Action Code: 46
Action Name: Impacted Right-of-Way (ROW) Notification
Action Desc: Contamination has impacted one or more rights-of-way (ROW). The affected right-of-way (ROW) holders have been notified by the DNR.
Action Comment: AUTO-POPULATED 2018-03-20

Action Date: 2005-01-05
Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.
Action Comment:

Action Date: 2009-01-07
Action Code: 43
Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comment:

Action Information

Action Date: 2020-04-22
Action Code: 83
Action Name: No Further Action Required per NR 708.09
Action Desc: Date DNR determined that no further action is required and the Activity is closed per NR 708.09. The Responsible Party (RP) has taken limited actions but was not required to conduct an NR 716 investigation. The site is not closed out under NR 726. No letter was issued unless a fee was paid.

Action Comment:

Action Date: 2020-02-05
Action Code: 29
Action Name: Phase II Environmental Site Assessment (ESA) Rpt Received
Action Desc: Date DNR received a Phase II (including 2.5, 3 etc.) Environmental Site Assessment (ESA) report.
Action Comment: PHASE 4

Action Date: 2020-02-05
Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.

Action Comment:

Action Date: 2020-04-22
Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.

Midwest Airlines Flight # 1669 outbound from Milwaukee, WI to Dallas-Ft. Worth, Texas, was pushing back from the gate area when passenger self-disclosed to the Flight Attendant that he had shotgun shells in his briefcase that he had forgotten and that the TSA screening point had not removed. The flight returned to the gate and was met by TSA and local law enforcement officials who removed the passenger and his belongings. The TSA did a security sweep of the aircraft and re-screened the passenger. They removed the shotgun shells from the passenger's carry-on bag and allowed him to re-board the flight. TSA re-screened the items for training purposes and turned them over to local law enforcement officers for disposal. TSA filled out their report and logged the items in. Subsequently, Midwest Airlines filed a Baggage Discrepancy Report to the FAA. TSA utilized this incident to produce training materials for their workforce. There was no explanation to the carrier as to why the ammunition was not discovered at the screening point.

Description of Events:

As ramp Agent was loading the bag for its initial flight, he noticed a strong odor and a wetness to the bag. Upon further investigation, he discovered an oversized lighter that has spilled all of its contents on the items in the bag. This was obviously a flammable liquid, so they did not load the bag and called TSA and Southwest Safety & Security to report the item and spill.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

National Priority List - Proposed:

PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

Deleted NPL:

DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

SEMS List 8R Active Site Inventory:

SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Jul 26, 2023

Inventory of Open Dumps, June 1985:

[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jul 26, 2023

Comprehensive Environmental Response, Compensation and Liability Information System -

[CERCLIS](#)

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jul 10, 2023

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Jul 10, 2023

RCRA Generator List:

[RCRA LQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jul 10, 2023

RCRA Small Quantity Generators List:

[RCRA SQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jul 10, 2023

RCRA Very Small Quantity Generators List:

[RCRA VSQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jul 10, 2023

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jul 10, 2023

RCRA Sites with Controls:

[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jul 10, 2023

Federal Engineering Controls-ECs:

[FED ENG](#)

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jun 22, 2023

Federal Institutional Controls- ICs:

[FED INST](#)

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jun 22, 2023

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites:

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: May 25, 2023

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Apr 3, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: May 2, 2023

Delisted Facility Response Plans:

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: May 2, 2023

Historical Gas Stations:

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals:

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property:

[SEMS LIEN](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jul 26, 2023

Superfund Decision Documents:

[SUPERFUND ROD](#)

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Mar 23, 2023

Formerly Utilized Sites Remedial Action Program:

[DOE FUSRAP](#)

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

Hazard Ranking List:

[SHWS](#)

Last published in 1994, this is a list of sites which were investigated by the Department of Natural Resources (DNR) under the Wisconsin Environmental Repair Law. Hazard ranking of a site or facility was performed to determine if the site or facility presents a substantial danger to the public health, or welfare, or the environment. The DNR Bureau for Remediation and Redevelopment now maintains other programs for the investigation and cleanup of potential and confirmed contamination to soil and groundwater in Wisconsin. This database is state equivalent CERCLIS.

Government Publication Date: July 1994

Licensed Solid Waste Landfills:

[SWF/LF](#)

List of licensed solid waste landfills in the state of Wisconsin as recorded by the Department of Natural Resources (DNR). The DNR regulates landfills to prevent negative impacts to people and the environment. DNR staff inspect landfills regularly.

Government Publication Date: Jun 8, 2023

The Historic Registry of Waste Disposal Sites:

[WDS](#)

Prior to development of on-line databases, the Wisconsin Department of Natural Resources (DNR) provided public information about old waste disposal facilities in a printed publication called the Historic Registry of Waste Disposal Sites (the "Registry").

Government Publication Date: Jul 22, 2013

Solid Waste - Landfills and Historic Waste Sites:

HIST LF

A list of active and inactive solid waste landfills and known historic waste sites available through the Wisconsin Department of Natural Resources' Open Data Portal. This list is based on the known or inferred limits of waste found in the 'Solid Waste - Landfills and Historic Waste Site Extents' dataset.

Government Publication Date: Jun 13, 2023

Solid & Hazardous Waste Information Management System:

SHWIMS

List of sites and facilities in the Solid and Hazardous Waste Information System (SHWIMS) regulated by the Wisconsin Department of Natural Resources (DNR) Waste and Materials Management (WMM) program. Activities that occur at site facilities include landfill operation, waste transportation, hazardous waste generation, wood burning, waste processing, sharps collection and many more.

Government Publication Date: Jul 11, 2023

Leaking Underground Storage Tanks:

LUST

A list of Leaking Underground Storage Tank (LUST) sites as recorded by the Wisconsin Department of Natural Resources (DNR). When petroleum products are released from underground tanks into the soil or groundwater, the DNR will work with the responsible party and environmental professionals to clean up the spill to state standards. This LUST site listing is sourced from the Bureau for Remediation and Redevelopment Tracking System (BRRTS) database and Open Data Portal applicable file/s provided by the DNR.

Government Publication Date: Jul 5, 2023

Leaking Aboveground Storage Tanks:

LAST

List of Leaking Aboveground Storage Tank (LAST) sites as recorded by the Department of Natural Resources (DNR). When petroleum products are released from tanks into the soil or groundwater, the DNR will work with the responsible party and environmental professionals to clean up the spill to state standards.

Government Publication Date: Jul 5, 2023

Delisted Leaking Tanks:

DELISTED LST

This database contains a list of closed leaking tank sites that were removed from the leaking tank database regulated by the Storage Tank Regulation Section of the Wisconsin Department of Natural Resources.

Government Publication Date: Jul 5, 2023

Underground Storage Tanks:

UST

List of Underground Storage Tank (UST) locations. The Bureau of Weights and Measures, operating under the Department of Agriculture, Trade and Consumer Protection is responsible for the administration and regulation of the Wisconsin Administrative Code ATCP 93 - Flammable and Combustible Liquids.

Government Publication Date: May 30, 2023

Aboveground Storage Tanks:

AST

List of Aboveground Storage Tank (AST) locations. The Bureau of Weights and Measures, operating under the Department of Agriculture, Trade and Consumer Protection is responsible for the administration and regulation of the Wisconsin Administrative Code ATCP 93 - Flammable and Combustible Liquids.

Government Publication Date: May 30, 2023

Delisted Storage Tanks:

DEL STORAGE TANK

This database contains a list of closed storage tank sites that were removed from the storage tank database regulated by the Storage Tank Regulation Section of the Wisconsin Department of Agriculture, Trade, and Consumer Protection.

Government Publication Date: May 30, 2023

Closed Remediation Sites:

CRS

This list of closed environmental remediation sites is provided by the Wisconsin Department of Natural Resources (WI DNR). The listing includes Environmental Repair Program (ERP) and Leaking Underground Storage Tank (LUST) sites where contamination affected soil, groundwater or other media, but the DNR has determined, based on information available at the time, that no further remedial action is required. A "site" is a contamination incident, not a property. A site may be smaller than a property or may include more than one property.

Government Publication Date: Jul 27, 2023

Deed Restriction at Closeout Sites:

AUL

List of sites for which a deed restriction is recorded at the Register of Deeds office. Deed restrictions limit property use or outline requirements for actions prior to future use. Deed restrictions are applied in cases where there is known soil contamination that is impracticable to remove, or an engineering requirement or NR270 industrial standards are in place.

Government Publication Date: Jul 5, 2023

Voluntary Party Liability Exemption Sites:

VCP

List of sites which have participated in the Voluntary Party Liability Exemption (VPLE) program, an elective environmental cleanup program administered by the Wisconsin Department of Natural Resources (DNR), and received an exemption from future environmental liability. Any individual, business or unit of government that conducts an environmental investigation and cleanup of a contaminated property - following state requirements with the oversight of DNR staff - can receive an exemption from future environmental liability. With some restrictions, most properties that have had a discharge of a hazardous substance are eligible for VPLE.

Government Publication Date: Jul 5, 2023

Brownfields Environmental Assessment Program:

BEAP

List of sites which participated in the Brownfields Environmental Assessment Program (BEAP) - a federal program that assisted municipalities with Environmental Site Assessments (ESAs) for tax delinquent or bankrupt properties, or properties a local government acquired for redevelopment. Site assessments to determine property contamination were conducted by the Department of Natural Resources staff.

Government Publication Date: Jul 5, 2023

Brownfields Listing:

BROWNFIELDS

The Department of Natural Resource (DNR)'s Remediation and Redevelopment program has a wide range of financial and liability tools available to assist local governments, businesses, lenders and others to clean up and redevelop brownfields in Wisconsin. DNR describes brownfields as abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfield properties present public health, economic, environmental and social challenges to the rural and urban communities in which they are located.

Government Publication Date: Jul 5, 2023

Brownfield Site Assessment Grant Projects:

BSA PROJECTS

In 2012, the Brownfield Site Assessment Grant (SAG) program was transferred to the Wisconsin Economic Development Corporation (WEDC), this was previously a financial tool of the Wisconsin Department of Natural Resources (DNR). This grant program helps local governments conduct initial activities and investigations at properties with known or suspected environmental contamination. The awarded grant funds cannot be used for environmental cleanup activities. Applicants must meet the eligibility definition outlined in s.292.75(1)(a), Wisconsin Statutes: "Eligible site or facility" means one or more contiguous industrial or commercial facilities or sites with common or multiple ownership that are abandoned, idle, or underused, the expansion or redevelopment of which is adversely affected by actual or perceived environmental contamination." This listing includes the current WDEC SAG projects, the final DNR Round 11 and 12 SAG DNR projects. The Round 12 SAG projects were tracked by the DNR, but not funded by the DNR since the SAG program was vetoed out of the budget.

Government Publication Date: Sep 30, 2015

Brownfields Grant Program Sites:

BGP

This list of Brownfield Grant Program sites is provided by the Wisconsin Economic Development Corporation. The Wisconsin Brownfield Program provides grant funds to assist local governments, businesses and individuals with assessing and remediating the environmental contamination of an abandoned, idle or underused industrial or commercial facility or site. This program will help convert contaminated sites into productive properties that are attractive and ready for redevelopment.

Government Publication Date: Jun 30, 2022

Environmental Repair:

ERP

Environmental Repair Program sites are those other than Leaking Underground Storage Tanks (LUSTs) that have contaminated soil and/or groundwater. Examples include industrial spills (or dumping) that need long term investigation, buried containers of hazardous substances, and closed landfills that have caused contamination. This ERP site listing is sourced from the Bureau for Remediation and Redevelopment Tracking System (BRRTS) database and Open Data Portal applicable file/s provided by the Wisconsin Department of Natural Resources (DNR).

Government Publication Date: Jul 5, 2023

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands:

INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 5, which includes Wisconsin, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 14, 2023

Underground Storage Tanks on Tribal/Indian Lands:

INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 5, which includes Wisconsin, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 14, 2023

Delisted Tribal Leaking Storage Tanks:

[DELISTED INDIAN LST](#)

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 26, 2023

Delisted Tribal Underground Storage Tanks:

[DELISTED INDIAN UST](#)

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 26, 2023

County

Milwaukee Tax Delinquent Brownfields:

[BROWNFIELD TAX](#)

A list of tax delinquent brownfields made available by the City of Milwaukee, Department of City Development. Based on at least an initial screening of these properties - including a historical land use check and a site visit - the City has decided not to foreclose because of potential environmental contamination. However, the City (using State Statute 75.106) may begin foreclosure, and then assign the foreclosure judgment to a new party that will remediate and redevelop the site. Testing may demonstrate that the site is clean or needs limited environmental clean-up.

Government Publication Date: Aug 24, 2023

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index:

[FINDS/FRS](#)

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program:

[TRIS](#)

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Oct 19, 2022

PFOA/PFOS Contaminated Sites:

[PFAS NPL](#)

This list of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been detected in water and/or soil is provided by the U.S. Environmental Protection Agency (EPA). EPA Disclaimer with FOIA file: Inclusion on the list does not necessarily mean that drinking water has been affected, nor does inclusion mean that anyone at the site has been exposed or is at risk for detrimental health effects.

Government Publication Date: Jun 15, 2023

Federal Agency Locations with Known or Suspected PFAS Detections:

[PFAS FED SITES](#)

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from March 2022 to April 2023. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Apr 24, 2023

SSEHRI PFAS Contamination Sites:

[PFAS SSEHRI](#)

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map, credited to the Northeastern University's PFAS Project Lab, Silent Spring Institute, and the PFAS-REACH team. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: <https://pfasproject.com/pfas-sites-and-community-resources/>

Government Publication Date: Oct 9, 2022

National Response Center PFAS Spills:

[ERNS PFAS](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Limitations: The data from the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Apr 15, 2023

PFAS NPDES Discharge Monitoring:

[PFAS NPDES](#)

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: May 1, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory:

[PFAS TRI](#)

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Oct 19, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality:

[PFAS WATER](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities:

[PFAS TSCA](#)

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest :

[PFAS E-MANIFEST](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Apr 9, 2023

PFAS Industry Sectors:

[PFAS IND](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Apr 16, 2023

Hazardous Materials Information Reporting System:

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

[NCDL](#)

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Feb 8, 2023

Toxic Substances Control Act:

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: Jan 21, 2023

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Apr 15, 2023

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Apr 15, 2023

Formerly Used Defense Sites:

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

FUDS Munitions Response Sites:

[FUDS MRS](#)

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites:

[FORMER NIKE](#)

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

[PIPELINE INCIDENT](#)

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Dec 30, 2022

Material Licensing Tracking System (MLTS):

[MLTS](#)

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites:

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

[MINES](#)

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites:

[SMCRA](#)

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into eAMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: Jun 13, 2023

Mineral Resource Data System:

[MRDS](#)

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites:

[LM SITES](#)

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Title II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: May 25, 2023

Alternative Fueling Stations:

[ALT FUELS](#)

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Jun 5, 2023

Superfunds Consent Decrees:

[CONSENT DECREES](#)

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Apr 19, 2023

Air Facility System:

[AFS](#)

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments:

[SSTS](#)

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Mar 1, 2023

Polychlorinated Biphenyl (PCB) Transformers:

[PCBT](#)

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Mar 20, 2023

State

Spills:

[SPILLS](#)

A list of spill events reported to the Wisconsin Department of Natural Resources (DNR). The DNR describes a spill as a discharge of a hazardous substance that may adversely impact, or threaten to impact public health, welfare or the environment. This spills listing is sourced from the Bureau for Remediation and Redevelopment Tracking System (BRRTS) database and Open Data Portal applicable file/s provided by the DNR.

Government Publication Date: Jul 5, 2023

Wisconsin Agricultural Spills Boundaries:

[AGSPILLS](#)

Boundaries of agricultural spill sites reported to the Wisconsin Department of Agriculture, Trade and Consumer Protection. The Agricultural Chemical Cleanup Program (ACCP) is in place to identify and manage pesticide and fertilizer spills to prevent these products from reaching the groundwater. Once a site has been identified as requiring remediation, the ACCP provides reimbursement for eligible costs incurred by the responsible person.

Government Publication Date: May 31, 2023

Wisconsin Agricultural Spills - Remediation Locations:

[AG SPILL REMED](#)

List of agricultural spill site remediation locations made available by the Wisconsin Department of Agriculture, Trade and Consumer Protection. The Agricultural Chemical Cleanup Program (ACCP) is in place to identify and manage pesticide and fertilizer spills to prevent these products from reaching the groundwater. Once a site has been identified as requiring remediation, the ACCP provides reimbursement for eligible costs incurred by the responsible person.

Government Publication Date: May 31, 2023

Wisconsin Bureau for Remediation and Redevelopment Tracking System:

[BRRTS](#)

The Wisconsin Bureau for Remediation and Redevelopment Tracking System (BRRTS) contains information on the investigation and cleanup of potential and confirmed contamination to soil and groundwater in Wisconsin. This database includes: sites where an abandoned container with potentially hazardous contents has been inspected and recovered, and no known discharge to the environment has occurred; sites where there was, or may have been, a discharge to the environment and, based on the known information, the Department of Natural Resources (DNR) has determined that the responsible party does not need to undertake an investigation or cleanup in response to that discharge; materials management sites that receive contaminated soil from other properties; and sites which have been removed from the tracking system and archived.

Government Publication Date: Jul 5, 2023

Delisted BRRT:

[DELISTED BRRT](#)

The Wisconsin Bureau for Remediation and Redevelopment Tracking System (BRRTS) maintained by the Wisconsin Department of Natural Resources contains information on the investigation and cleanup of potential and confirmed contamination to soil and groundwater in Wisconsin. Sites and site details are removed from the data made available to the public when the source of contamination is unclear and an investigation to determine the source of contamination is in progress.

Government Publication Date: Oct 27, 2015

Per- and Polyfluoroalkyl Substances (PFAS):

[PFAS CONTAM](#)

List of sites at which the Wisconsin Department of Natural Resources (DNR) has determined further action is required due to confirmed per- and polyfluoroalkyl (PFAS) contamination. DNR advises that the information as presented may be incomplete and is subject to change as new information becomes available.

Government Publication Date: Jul 5, 2023

Municipal System PFAS Sampling:

[PFAS SAMPLING](#)

List of sample points where municipal water supply is impacted by per- and polyfluoroalkyl substances (PFAS). Listing made available by the Wisconsin Department of Natural Resources (DNR).

Government Publication Date: Nov 9, 2022

Dry Cleaner Environmental Response Fund:

[DRYC REM](#)

A list of facilities enrolled in the Dry Cleaner Environmental Response Fund (DERF) or have a reported historical use as a dry cleaning facility. This is only a listing of known remediation sites with a cleanup of contamination that may be related to dry cleaning substances. The Remediation & Redevelopment Program does not regulate or license Dry Cleaning Facilities The "status" provided in this list is only in regards to the cleanup and not the operations of the facility.

Government Publication Date: Jul 26, 2023

Five Star Recognition Program Sites:

[DRYCLEANERS](#)

The purpose of Wisconsin's Five Star Environmental Recognition Program for Drycleaners was to encourage drycleaners to become more environmentally-friendly. The program was divided into five different star categories, with the ultimate goal being to achieve the Five Star status. The program was sponsored by the Wisconsin Fabricare Institute (WFI), in cooperation with the Department of Natural Resources, the Department of Commerce, the University of Wisconsin Extension-Solid and Hazardous Waste Education Center and the Center for Neighborhood Technology. WFI discontinued the program on Jan 1, 2013

Government Publication Date: Jan 1, 2013

Delisted Dry Cleaner Environmental Response Fund:

[DELISTED DRYC REM](#)

Sites which once appeared on - but have since been removed from - the list of sites in the Dry Cleaner Environmental Response Fund Program made available by the Wisconsin Department of Natural Resources (DNR). The Dry Cleaner Environmental Response Fund Program reimburses dry cleaners for the investigation and clean up of the release of chemicals used in dry cleaning.

Government Publication Date: Jul 26, 2023

Liens and Notices of Contamination:

[LIENS](#)

A list of sites with liens and notices of contamination. This list is made available by the Wisconsin Department of Natural Resources (DNR).

Government Publication Date: Aug 17, 2023

Tier 2 Report:

[TIER 2](#)

A list of Tier 2 facilities in Wisconsin. This list is provided by the Wisconsin Emergency Management/ State Emergency Response Commission.

Government Publication Date: Jan 19, 2023

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
